FOREWORD BY THE EXECUTIVE MAYOR CLLR S.S NKOSI
IDP REVIEW 2010/2011

Local government operates in an ever changing macroeconomic environment. The dynamic nature of local, national and global environments constantly presents local government with new challenges and demands. Similarly the needs of local communities continuously change. Our five year Integrated Development Plan (IDP) is reviewed annually so that we can always be confident that it addresses the real and relevant needs of our populace.

Govan Mbeki Municipality is experiencing rapid urban growth which directly results in enormous pressure on the environment.

To comply with the growing needs of the Govan Mbeki's population the municipal council must ensure all development within our municipal area is economically competitive and socially acceptable. It is also crucial that we recognize and effectively manage the environment within which social and economic development occurs in order to ensure a sustainable environment.

Within a year another cycle of the IDP prepared in terms of the Municipal Systems Act , 2000 will come to an end a new cycle will commence in 2010/2011. With this in mind, our municipality as part of its desire to continuously improve its performance expressed the need to revisit its current development-planning model.

It is for this reason the municipal council resolved to phase in Ward Based Planning as part of the effective IDP process and we are confident that the populace has adequately participated in this process to ensure that their valuable inputs inform municipal planning and the next budget.

I thank you.

FOREWORD BY THE MUNICIPAL MANAGER: DR L H MATHUNYANE 2010/2011 FINANCIAL YEAR

It has been noted by the Ministerial Task Team interim report that one of the many challenges in local Government which contributed to the flaring-up of service delivery was the misalignment of the integrated Development Plan to the Budget: The system Act:32 of 200, chapter 4 compels the institution to engage with Communities on Development matters.

The IDP review process is fundamental in addressing service delivery related matters, and this must be taken advantage of by all stakeholders. There is a legislation injunction that Municipal planning cycle is done within a set timetable, so as to coincide with the planning of both Provincial and National sphere of government. It is therefore imperative that all IDP Review engagements (Community meetings and IDP forums) are being attended by all stakeholders so as to make their input before the Plan is adopted by Council.

Equal important to be considered by the council is the issue of the municipally turnaround strategy as well the usage of household survey statistical information to base on the planning of the municipality..

Thank You

1. IDP OVERVIEW

1.1 INTRODUCTION

Vision:

“To lead in service delivery and economic development”

Mission:

“Championing an integrated service delivery and sustainable economic growth with stakeholder involvement”

Corporate Values:

- Transparency
- Accountability
- Excellence
- Consultation

Strategic Focus Areas	Strategic Objectives
Infrastructure and Services	To provide, improve and sustain infrastructure and services
Social and Economic Development	To promote socio-economic development in rural and urban areas
Institutional Transformation	To enable and speed up institutional transformation and effectiveness
Democracy and Good Governance	To strengthen democracy and good governance
Financial Management and Viability	To improve and sustain financial management

The 2008 – 2011 Integrated Development Plan document is meant to guide development and planning for the new political office bearers with emphasis on improving socio-economic situation, meeting millennium targets, improving service delivery mechanisms, strengthening and improving inter-governmental relations and community participation. The aim of the documents is to ensure comprehensive Integrated Planning and Economic Development within the Govan Mbeki Municipality.

IDP must reflect the municipal / council's vision for the long term development of the municipality and cite critical development and internal transformation needs.

An assessment of the existing level of development in the municipal jurisdiction, identification of communities that are indigent, communities who do not have access to basic municipal services.

The IDP as the strategic business plan of government institution will allow one to identify together with the community that is affected sustainable projects that can be funded by government or by private sector, and projects that demand co-funding by both the private sector and public sector.

It can also be used as tool for community building and transformation. The IDP should also contain information relevant to the following key components viz Financial Planning, Disaster Management Plan, Spatial Development Framework, Local Economic Development Planning which collectively assist to attract direct investment and foreign indirect investments.

The IDP of the institution must also capture key performance indicators and performance targets of the institution, business case of the institution to reflect the municipal priorities, objectives of the political leg of the institution, fusion of all the spheres of government in terms of planning as well as capture all the sectoral plans.

Using the IDP one will be able to reverse the legacy of the past by utilizing tools provided in the IDP to restructure cities, towns and rural areas, promote social equity, align and coordinate resources across the spheres of government.

It is through the integrated development planning process that issues cutting across the spheres of government are handled without any duplication.

The following strategies will also assist in guiding development within the municipality viz: Human Resource Management and Development, Housing Chapter, Local Economic Development.

1.2 MUNICIPAL OVERVIEW

1.2.1 Locality:

- Govan Mbeki Local Municipality is located in the north western side of the Gert Sibande District Municipality and in the south-western part of Mpumalanga Province, abutting Gauteng, approximately 150 km east of Johannesburg and approximately 300 km southwest of Nelspruit.
- The municipality is strategically placed between KwaZulu Natal, Free State, Gauteng and Swaziland and is linked by national roads and railway lines.

1.2.2 Area:

- Govan Mbeki is 2958.9 km² in extent
- This equates to 9.3 % of the Gert Sibande land mass.

1.2.3 Study Area:

- *Secunda*: was established in 1975 as a direct result of the establishment of the Suid-Afrikaanse Steenkool en Olie (SASOL) plant to produce alternative fuel for South Africa during the height of international isolation of the previous Government. The town was established firstly to provide close accommodation for workers employed by SASOL and secondly to serve as a local service centre for the sub-region. The first extension of Secunda was proclaimed in 1977 and the town has now grown to accommodate 40400 (1996 figures) people.
- *Trichardt*: The town is situated to the east of Secunda with the railway line to the SASOL plant forming a major constraint to the total spatial integration of the two urban nodes. Trichardt was established in the early 1900's as an agricultural station. Trichardt had the fastest growth after the

establishment of SASOL in 1975. After the establishment of SASOL however, the agricultural character of the town has gradually diminished and today Trichardt resembles a fully fledged town with sufficiently well developed infrastructure. The town has however, not grown significantly in terms of spatial growth over the years and it currently has a population of about 3800 people.

- *Kinross*: was established as an agricultural service centre. It forms a linear stretch along the N17 and the railway line to the south of the town and is directly linked to Secunda an SASOL via a dual carriageway south of the towns. The town is largely reliant on SASOL for employment as well as to a lesser extent, the surrounding Power Stations and commercial farming activities. The area of Thistle Grove to the west of Kinross has provided an important dormitory to the majority of labour to both SASOL and the nearby Matla Power Station. Economically, Kinross relies mainly on through traffic from Gauteng to Secunda and the N17 road is therefore very significant to the business activity of Kinross. Together with Thistle Grove, Kinross has an estimated population of about 10 000 people including Siphumelele [ext 25].
- *Evander*: Was established in 1955 as a result of the discovery of gold in the Highveld Ridge area. It was established primarily to accommodate mining employees from "Gengold" and Kinross gold mines to the extent that even to date about 90% of the residents of Evander are employees of Harmony Mine Company. It is situated about 8 km west of Secunda and like Secunda; it is endowed with good infrastructure and other Engineering Services. The town was proclaimed in 1960 and obtained her full municipal status in 1972. Evander still has a limited commercial service component and her 12 500 residents depend largely on Secunda for most of their commercial service needs and employment opportunities.
- *Embalenhole*: With the growth of Sasol Synthetic Fuels as the major employer and its increased drive to recruit labour from a field in the late seventies, it became necessary to establish a dormitory town within the Highveld Ridge complex to accommodate the increased workers employed by Sasol Synthetic Fuel. As a result, eMbalenhole was established in 1978 on the farm Langverwacht 282 IS The town is based on a mixture of traditional gridiron and modern town planning designs and boasts some of the modern community facilities within the sub-region. eMbalenhole has grown significantly from its inception in 1978 and today it has approximately 210 000 inhabitants.
- *Charl Cilliers*: Situated about 30 kilometers south of Sasol lies the township Charl Cilliers. Mainly residential stands, that serves in the housing need of the HRTLC area although only 10% are yet developed. A Church, Police Station, Post Office and several General Dealers are situated within Charl Cilliers. The community of Charl Cilliers relies mainly on through traffic (105-1) to create business opportunities for the residents. Some of the internal roads are tarred. Eskom, provides electricity and sewerage disposal tanks are provided within the township. Lately, some squatters moved into the area and this already created tension and conflict between different parties living in the same area.
- *Bethal*: In the late seventies of the nineteenth century the distribution of the population was such that the need for an independent congregation gave rise to the Parish of Bethal. In 1904, Bethal was declared a municipality and Mr George Hutchinson was elected the first chairman of the Municipal Council of Bethal. In 1905, the railway line from Springs to the North Coast reached

Bethal and contributed to the prosperity of the town. Today, Bethal has approximately 20 000 residents depending on her.

- *Emzinoni*: The eMzinoni extension has a virtually square shape and has the following logical physical boundaries: North: The Baanbreker road – provincial road no 456; West: the western boundary of portion 4, Blesbokspruit 148 IS; South: the proposed provincial road – P109-1; East: the Bethal -= Standerton road – P30-2. eMzinoni and its environs are located within the Highveld region consisting of a rolling hill landscape at an average elevation of about 1640 m above sea level. The area drains into the south flowing Blesbokspruit located to the west of eMzinoni. Topography is essentially level in the flood plains and vegetation comprises thick grass. Over the remainder of the site vegetation comprises maize, Lucerne, sun flower and bean fields and typical Highveld grass in uncultivated areas. There is approximately 100 000 residents in eMzinoni Township.
- *Leandra*: The Leandra Local Council is within the area of jurisdiction of the Gert Sibande District Council. The town consists of the towns of Eendracht, Leslie and Lebohang. Leandra was established to fulfil a service centre role for either the mining and or agricultural sectors in the district. The district is close to Gauteng and the Witbank-Middleburg complex. The centre benefit directly from spill-over effects from development in these centres. Today, Leandra has approximately 80 000 residents.

1.2.4 Boundaries and Neighbours:

- Govan Mbeki Local Municipality is bounded by Msukaligwa Local Municipality to the east, Lekwa Local Municipality to the south, Dipaleseng Local Municipality and Gauteng Province (Sedibeng Municipality) to the west and Nkangala District Municipality to the north.
- The spill over effects of Gauteng and the Witbank-Middleburg developments has direct benefits for the economy of the Municipality.

1.2.5 Key Features:

- The largest towns in the municipality are Secunda and Bethal.
- Smaller settlements include Kinross, Evander, Embalenhle, Leandra, Lebohang, Trichardt, Emzinoni and Charl Cilliers.
- The N17 freeway passes through the municipal area.
- Rail routes run through Govan Mbeki from Gauteng to KwaZulu-Natal but are used for the transportation of goods only.
- The main land use in the area is farming, the majority of which is commercial farming.
- The petro-chemical industry is the key industry in the area with SASOL being the major investor in this sector.
- SASOL Mining is operating 5 Coal Mines and Harmony Mining 3 gold Mines

1.2.6 Climate and Air Quality:

The Municipality is situated in a subtropical climate zone, where rainfall occurs in the summer months between September and May. Throughout the region, 95% of the rainfall is received during the summer six months, October to March, but the month of maximum precipitation is either January or February. The western portions of the municipality can receive between 600-800mm/year and the eastern portion can receive between 800-1000mm/year.

In summer, temperatures range from as high as 40 degree Celsius during the day to 10 degree Celsius in the evenings. Winters are milder and temperatures usually vary

between 20 degrees Celsius during the day and 10 degree Celsius in the evenings. Frost does occur, but apart from light frost which may occur from May to August, the period during which ordinary frosts may be expected is less than 30 days per year.

Five pollution transport pathways across the Highveld with regards to wind direction were determined according to wind directions over South Africa. The most relevant transport pathways in the Gert Sibande District Municipality are the direct transport towards the Indian Ocean and recirculation over the subcontinent.

1.2.7 Topography / Geology / Soil Potential:

Govan Mbeki is fairly flat with no areas with a slope of more than 9%. The municipality falls within the Karoo Supergroup. The underlying rock types of the area are dominated by the presence of dolerine intrusion, arenite and rhyolite deposits.

The soil potential varies from a poor suitability for agriculture on the northern border and south western regions. The soil potential in the area is impacted upon by mining activities as well as by unsuitable agricultural activities and the use of pesticides which inflict negative impact on the quality and arability of the soil.

1.2.8 Hydrology and Wetlands:

Govan Mbeki Municipality straddles the divide between the Upper Vaal Water Management Area, and the Olifants River WMA in the North of the municipality. Due to the location of a major continental divide (watershed) which runs east to west across the municipality, the rivers in the municipality flow either in a northerly or southerly direction.

The Trichartspruit flows northwards from the municipality, and forms the part of the upper catchment of the Olifants River. The Blesbokspruit, which flows through Bethal, and the Waterval River, drains southwards towards the Vaal River in the South. The headwaters of the Suikerbosrant River rise in the municipality and flow out of the municipality in the west. Both the upper Olifants and Waterval (Vaal) catchments are seriously impacted by concentration of mining and industry in the Secunda area. River ecosystems in this area are generally in a fair to poor condition.

Both pans and palustrine (marsh/vlei) wetlands occur in the municipality. A large (vlei) wetland system occurs along the Suikerbosrant River and a number of small non-perennial pans exist. Extensive seepage areas exist in the streams and rivers draining northwards from the municipality.

These areas play an important role in the hydrological functioning of the Olifants River, attenuating water and through the slow release of water ensuring perennial flow within the upper catchment. The drainage of wetlands as well as the industrial and agricultural activities that are taking place in the municipality have a negative impact upon the water quality and hydrological systems of the municipality.

1.2.9 Biodiversity:

Govan Mbeki Municipality does not have areas of particularly high biodiversity. However, the highest biodiversity in the municipality is located in the northern sections, to the north of the N17 Highway.

The municipality is dominated by Acocks Themed Veld (Turf Highveld) with a band of Bankenveld to the north west of Bethal. These veld types have all been transformed over the entire Mpumalanga to some degree by various land uses.

Negative impacts on biodiversity in this area are related to mining, industry and agriculture. Many of these impacts are significant and should be managed on a site specific basis. Natural and untouched habitants are rapidly decreasing and becoming increasingly fragmented into unsustainable habitants, which leads to loss of biodiversity.

Agriculture, grazing, forestry, mining, industry and urban development impact on biodiversity whether it's through mechanical clearance of existing vegetation or pesticides and pollution entering the ecosystem.

1.2.10 Spatial:

As far as its regional content is concerned, Govan Mbeki is situated on the Gauteng/Richards Bay Corridor formed by the National Road N17 and the Richards Bay rail line running through the area in an east-west direction. Govan Mbeki has the most diversified economy within the Gert Sibande District, dominated by the petrochemical industry (the SASOL II and III complexes) and coal and gold mining. Govan Mbeki has the largest underground coal mining complex in the world which makes it an important strategic area within the national context.

The area can be described as mostly agricultural / rural, with 3 urban conglomerations situated within it, namely Leandra / Lebohang on the western edge, the Greater Secunda (Trichardt, Evander, Kinross and Secunda/eMbalenhle) conurbation in the central part and Bethal / eMzinoni on its eastern edge.

The municipality has major mining (both coal and gold) industries like the Sasol Mines, Sudo-Coal, Isibonelo and others; Sasol and its companies and various production companies.

The most prevalent land uses in rural areas are commercial agriculture, coal and gold mining. A number of rural informal settlements occur in the area.

51,5% of the total population reside in the central Greater Secunda Complex, 21,6% reside in Bethal/eMzinoni, 14,1% reside in Leandra/ Lebohang and 12,8% stay in rural hinterland. There is a huge socio-economic gap between the previous white areas and the previous disadvantaged township areas.

The economy of the municipality is dominated by SASOL, coal and gold mining and commercial agriculture. The Johannesburg – Richards Bay freight rail line and National Road N17 traverse the area in an east-west direction and are augmented by a number of provincial roads connecting it to a wider region.

Municipal services infrastructure in the municipality is located mostly within the urban areas. Some infrastructure backlogs exist, especially within the previously disadvantaged township areas. As far as the outlying rural areas are concerned, these rely almost exclusively on borehole water and septic tanks / pit latrines, while electricity is provided by Eskom. Developmental projects are initiated and carried out through PPP and in support of the government initiative of the EPWP.

As far as housing demand is concerned, there are still a number of homeless people living in informal settlements throughout the study area. The total housing backlog is estimated at approximately 60 000 units. A number of major low cost housing projects are currently being implemented, whilst there are a number of other developments taking place, amongst others, the duplex complexes, flats and office

complexes and recently the first township mall at eMbalenhle that hosts approximately 50 chain stores.

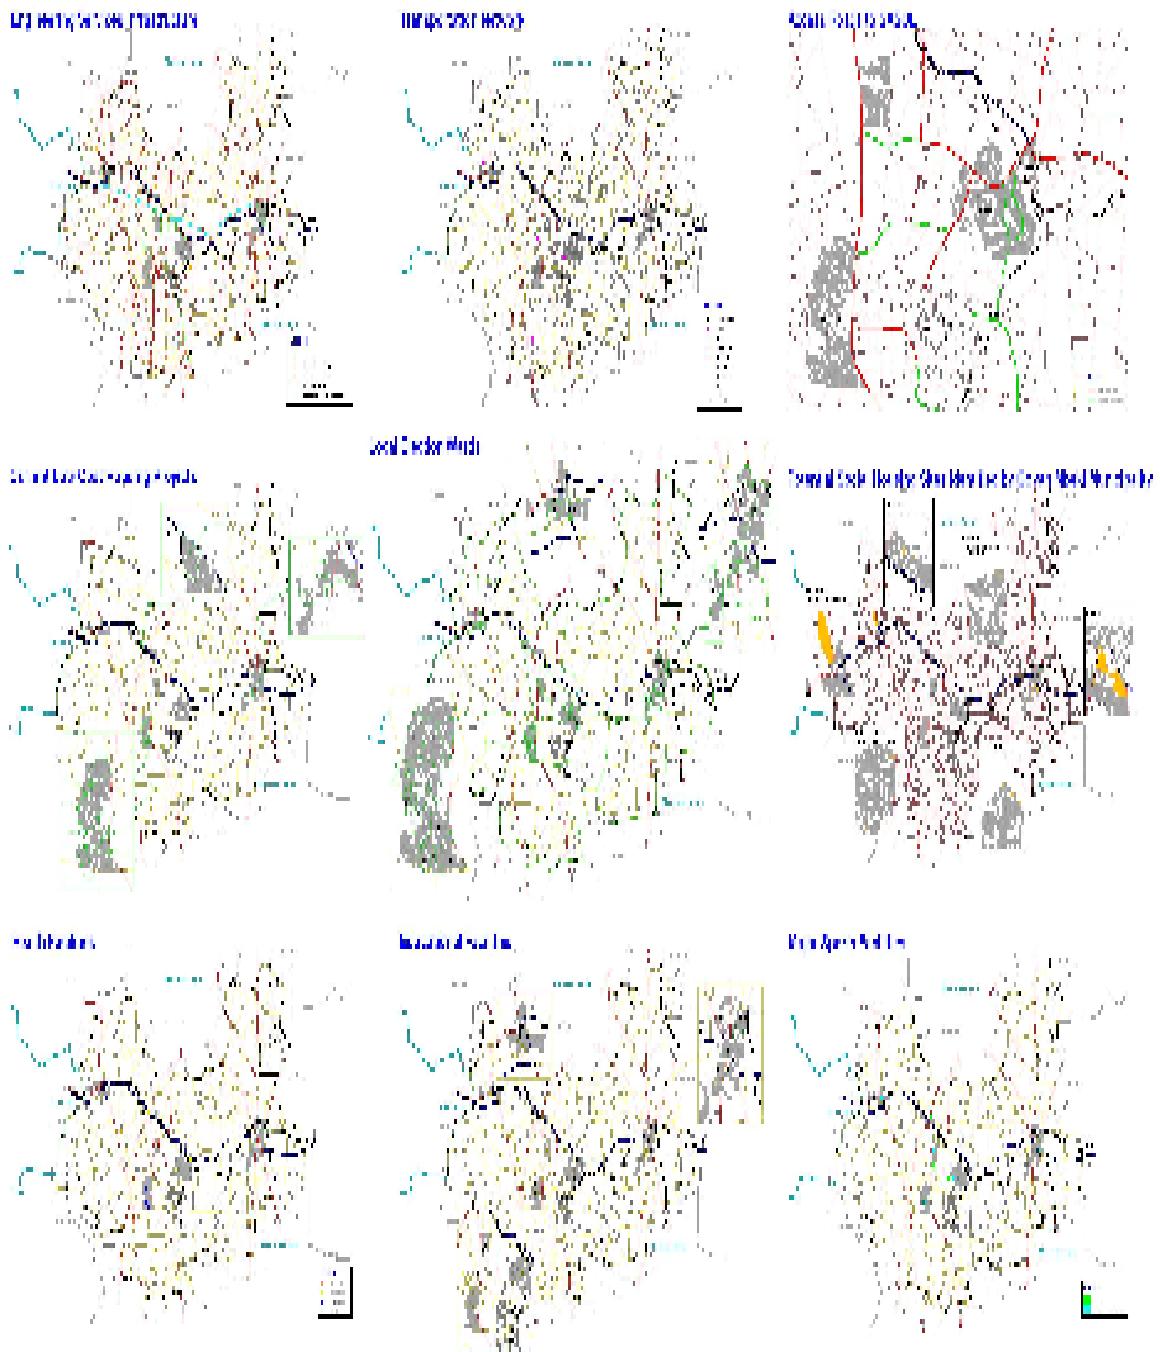

Secunda / Trichardt is by far the most active business zone in Govan Mbeki. Secunda's regional role is underlined by the fact that 45% of the financial, administrative and professional concerns are situated here. Industrial activity in the area is completely dominated by SASOL, whose site area makes up to 85,7% of the total industrial / commercial land in the study area.

Community facilities tend to be clustered within the existing urban areas. Except for some farm schools, the outlying, sparsely populated rural areas do not have community facilities. Substantial backlogs exist in the provision of some community facilities. The development of LUMS will enhance the revitalisation of all towns within the municipality. The SDF seeks to provide future developmental opportunities within the municipal area.

As far as the environment is concerned, sensitive environments within the study area include the grassland biome as well as aquatic and wetland habitats. Pollution emanating from SASOL, the coal-fired power stations in adjacent areas and the various mining activities is a huge problem.

Govan Mbeki SDF

Engineering and Social Infrastructure

- Further information on the engineering and infrastructure is available on the SDF document

1.2.11 Institutional Capacity / Institutional Plans:

ISSUES	GOVAN MBEKI MUNICIPALITY
Organisational Structure	Approved. New structure under review

1.3.2 Population Groups and Gender

The following table depicts the population in Govan Mbeki Municipality in 2007 the blacks constituted 211 807, the white constituted 37 901, the coloured 1 944, the Asian 2 380. There were more males (129 440) across colour line than females (124 592).

Source: Global Insight: Regional eXplorer 388 (2.2b)

With 254 031 people chart 1 shows that the Govan Mbeki municipality accounts for the largest share (26%) of the Gert Sibande population followed respectively by Albert Luthuli (19%), Msukaligwa (14%) and Mkhondo (15%). Dipalaseng on the other hand is the least populated municipality within the Gert Sibande, accounting for 39 901 people (4%) of the population.

Chart 2 depicts the following that Govan Mbeki Municipality is experiencing population growth (17.4%).

The municipality is experiencing a huge migration due to employment opportunities offered by SASOL and the surrounding mines

Chart 1: Population by Municipalities (%) 2007

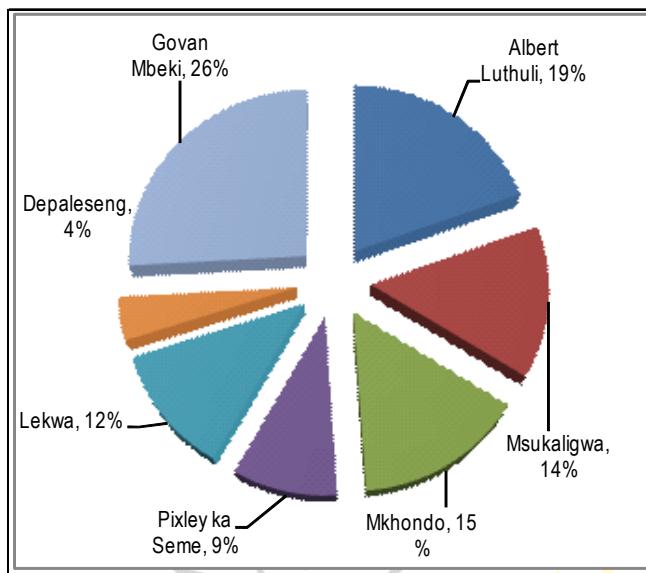

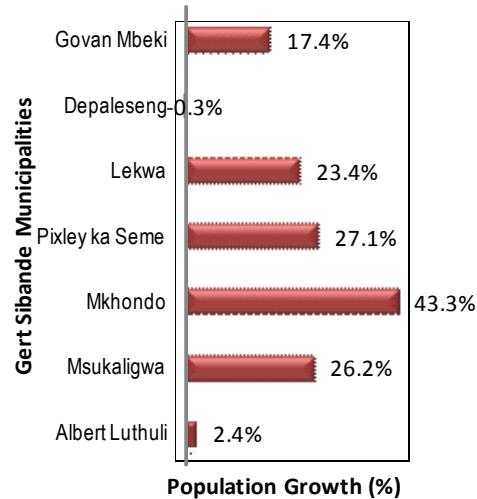

Chart 2: Population Growth

1.3.3 Population by Age and Gender

In 2007 women made up the majority (50.7%) of the Gert Sibande population. During the same period the population is below the age of 14 was estimated at 326 459 or 33.5% of the GSDM population while those aged 60 and above were estimated at 66 957 (6.8%) of the population.

The youth (aged between 15 and 34 years) constitute 35.5% while the economically active population (ages of between 15 and 64 years) account for 62.3% of the total population. Another important observation is that the youth account for 56.9% of the economically active

Source: Global Insight: Regional eXplorer 388 (2.2b)

1.3.4 HIV Estimates:

HIV and AIDS impacts on the economy indirectly through morbidity as well as mortality. The former refers to loss of labour productivity due to illnesses and the increased health care costs.

AIDS related deaths result in the reduction of the population growth rates which in turn affect the skills availability. It has been variously observed that youth, especially young women are particularly vulnerable to infections for a variety of reasons including social and cultural power relations. The Govan Mbeki population is quite young and therefore predisposed to the risk of HIV infections

1.3.5 Demographic Implications for Govan Mbeki Municipality:

A relatively high population of people below age 14 which mean that health and education must be given a priority status in development planning.

The concentration of the economically active population below age 35 implies that employment and economic opportunities must reflect a bias towards youth which may include intensive skills development, on the job training etc.

The youth, in particular young women, are considered to be more vulnerable to social and economic deficits and the risk of contracting HIV.

The future size and quality of the economically active population will depend in large part on the ability of the municipality to develop the appropriate skills and most importantly, to retain these skills within the District municipality.

To a large extent these implications are the same for the district, region, province and country.

1.3.6 Development Profile:

➤ Human Development Index

According to Global Insight (2007) the Human Development Index (HDI) is a composite, relative index that attempts to quantify the extent of human development of a community. It is based on measures of life expectancy, literacy and income. It is thus seen as a measure of people's ability to live a long and healthy life, to communicate, to participate in the life of the community and to have sufficient resources to obtain a decent living. The HDI can assume a maximum level of 1, indicating a high level of human development, and a minimum value of 0.

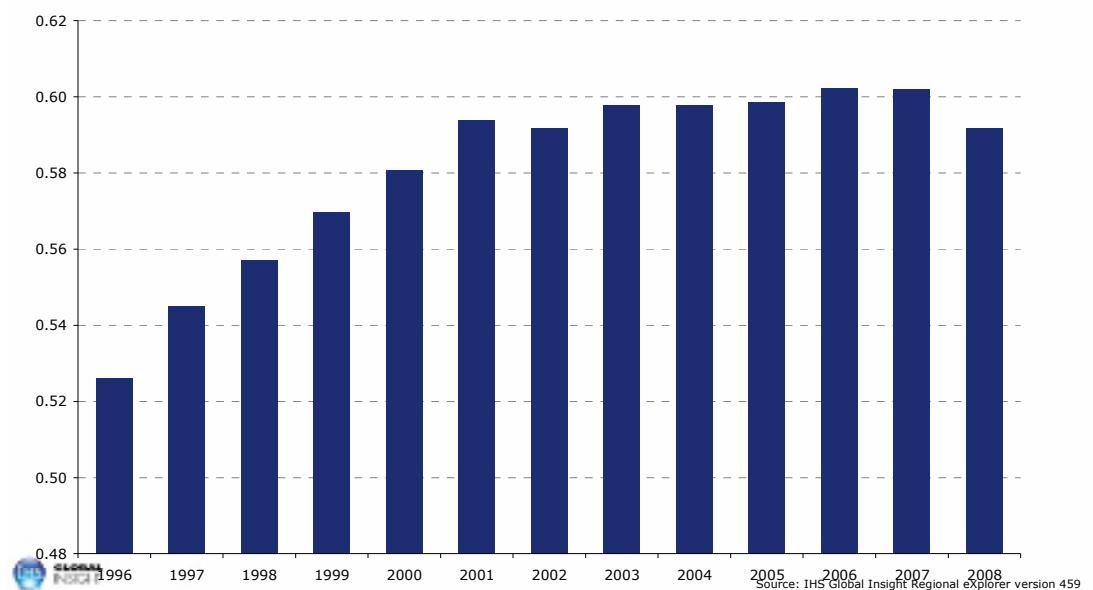

Table 3 below shows that, at (0.63) the HDI for Govan Mbeki is higher than both the Mpumalanga (0.53) and the national one (0.60). Also that, in addition to Govan Mbeki, only Msukaligwa (0.53) and Lekwa (0.55) are have HDI's equal to or above that of Mpumalanga. Of concern is that the indices for Mkhondo, Pixley ka Seme and Lekwa have not changed in past 7 years while that of Msukaligwa has decreased. Similarly, where improvements were observed, they were found to have been slower compared to the national levels. The improvements in HDI suggest that the various development interventions have had some impact albeit marginal over the past 11 years.

Table 3: Gert Sibande State of HDI, Gini Coefficient and Poverty Rates

	Human Development Index (HDI)			Gini Coefficient			% People Living in Poverty		
	1996	2001	2008	1996	2001	2009	1996	2001	2009

➤ *Gini Coefficient*

IHS Global Insight (2007) defines the Gini coefficient is a summary statistic of income inequality, which varies from 0 (in the case of perfect equality where all households earn equal income) to 1 (in the case where one household earns all the income and other households earn nothing). A low Gini coefficient indicates more equal income or wealth distribution, while a high Gini coefficient indicates more unequal distribution. In practice the coefficient is likely to vary from approximately 0.25 to 0.70.

In terms of Table 3 above, most Gert Sibande local municipalities have relatively high Gini coefficients or high levels of income inequality. While the levels of inequality are broadly characteristic of the broader South Africa, the fact that they have continued to increase since 1996 and remain above the national level is a cause for great concern.

➤ *Income Poverty*

Poverty is often defined as deprivation of those things that determine the quality of life, including food, clothing, shelter and safe drinking water, as well as "intangibles" such as the opportunity to learn and to enjoy the respect of fellow citizens. One of the important indicators of poverty in a region is the number of households with an income below the Minimum Living Level (**MLL**). The MLL is annually determined by the Bureau of Market Research (UNISA). It is calculated for different regions, racial groups, household sizes, and reflects the minimum amount a household needs to earn to meet its basic needs.

In terms of Table 3 above Dipaleseng has the highest number (68.6%) of people living below the MLL while the number is lowest (29.2%) in Govan Mbeki. While it is encouraging that poverty rates have declined across all municipalities since 2001 they remain above the national rate of 42.9%. The decline has been widely attributed to the extension of the state's social security network.

Another important variable in measuring poverty is the poverty gap. This measure is used to derive the difference between each poor household's income and the poverty line. It thus measures the depth of poverty of each poor household. The aggregate poverty gap is calculated by summing the poverty gaps of each poor household. It is thus equivalent to the total amount by which the incomes of poor households need to be raised each year to bring all households up to the poverty line and hence out of poverty. It is the amount of income that would be required to bring every poor person exactly up to the poverty line, thereby eliminating poverty. According to IHS Global Insight (2007) the poverty gap has seen a marked increase in all municipalities since 1996.

Halving poverty by 2014 is the policy goal of South African government. Attaining this goal requires better targeting, effective coordination and integration of poverty intervention programmes across all spheres of government. This, in turn depends on the ability of all stakeholders to understand both the causes, manifestations, spatial characteristics and impact of poverty across age, gender of poverty. The increase in the number of people living in poverty suggests that, the current interventions are beginning to have desired impact.

➤ *Literacy and Education Levels*

Functional literacy is defined as the proportion of persons aged 20 and above that has completed Grade 7. It is the inability of an individual to use reading, writing and computational skills efficiently in everyday life situations. An increase in the basic literacy skills of adults has a positive effect on any economy. Functionally illiterate people are unlikely to take advantage of opportunities that are thrown up by the permeation of the information and communication technologies (ICT's). Research has found that, adults with better literacy skills are more likely to be employed, and to earn more, than those with poorer literacy skills, even when taking account of other factors which affect work performance.

Table 4 below indicates that Govan Mbeki has the highest (74.3%) number of functionally literate people and Mkhondo has the least (50.1%). With the exception of Govan Mbeki, the literacy rates of all the Gert Sibande municipalities remains below the national average of 71.3%.

It is generally accepted that education expands the range of options from which a person may choose and thus creates opportunities for a fulfilling life. It satisfies the basic human need for knowledge and skills. It provides a means of meeting basic needs, provided that adequate employment opportunities exist, and also helps sustain and accelerate overall development. The level of education of the population in a region influences its welfare through the indirect effects on health, fertility and life expectancy. Education helps to increase the value of other forms of social and physical investment.

Table 4: Highest Level of Education: Age 15+

Education Levels	National	Mpumalanga	Gert Sibande	Albert Luthuli	Msukaligwa	Mkhondo	Pixley ka Seme	Lekwa	Depaleseng	Govan Mbeki
No schooling	11.5%	17.6%	16.7%	21.6%	17.2%	21.4%	23.0%	12.4%	18.3%	10.4%
Grade 0-2	1.7%	1.8%	2.2%	1.8%	1.7%	2.8%	2.7%	3.3%	3.7%	1.6%
Grade 3-6	11.2%	11.2%	13.0%	11.4%	12.3%	15.2%	14.8%	15.6%	15.6%	11.2%
Grade 7-9	23.5%	22.6%	23.3%	23.0%	23.6%	23.1%	23.5%	25.5%	23.6%	22.5%
Grade 10-11	20.8%	20.3%	20.3%	21.3%	21.1%	18.7%	16.9%	19.4%	19.6%	21.8%
Less than matric & certif/dip	0.8%	0.6%	0.5%	0.4%	0.5%	0.4%	0.5%	0.5%	0.5%	0.6%
Matric only	22.2%	19.9%	18.4%	16.1%	18.3%	14.9%	13.9%	18.0%	14.9%	24.0%
Matric & certificate / diploma	5.4%	4.5%	4.1%	3.5%	4.0%	2.6%	3.4%	4.0%	2.8%	5.7%
Matric & Bachelors degree	1.9%	1.2%	1.0%	0.8%	1.0%	0.7%	0.9%	1.0%	0.6%	1.5%
Matric & Postgrad degree	0.8%	0.4%	0.4%	0.2%	0.3%	0.2%	0.4%	0.4%	0.3%	0.7%

Source: Global Insight: Regional eXplorer 388 (2.2b)

The table above depicts that 10.4% of the Govan Mbeki population aged 15 and above no form of schooling, 1.6% has gone up to grade, that 21.8% has gone up to grade 10-11, that only 24.0% has gone up to matric, that 0.7% has gone up to matric and postgraduate degree. This alone speaks volumes about the skills potential of the area and its ability to influence and inform development.

1.4 SOCIO-ECONOMIC PROFILE

1.4.1 Dwelling types (Statssa 2006):

	Formal	Informal	Traditional	Other
Govan Mbeki	36 413	23 687	1 422	192

Source: GSDM WSDP 2006

1.4.2 Labour Market Status (economically active population StatsSA 2006):

	Employed	Unemployed	Not economically active
Govan Mbeki	1 246	40 189	50 746

Source: GSDM WSDP 2006

The table above reflects the labour force within the municipality and demonstrates a huge challenge on the number of economically active population that is not employed nor engaged in any economic activity.

1.4.3 Extent, Population and People below minimum living standard and household income:

Extent (ha)	Population StatsSA 2006	Population below min. living standards	% People below min. living standards	Total Household income R	% to total household income for GSDM
295 470	221 731	102 287	45,83	3,115,704,748	43,36

Source: GSDM WSDP 2006

1.4.4 Economically Active Population in 2007:

Gender Grouping	Govan Mbeki	Gert Sibande
Male	73 573	220 690
Female	59 727	190 881
Total	133 300	411 571

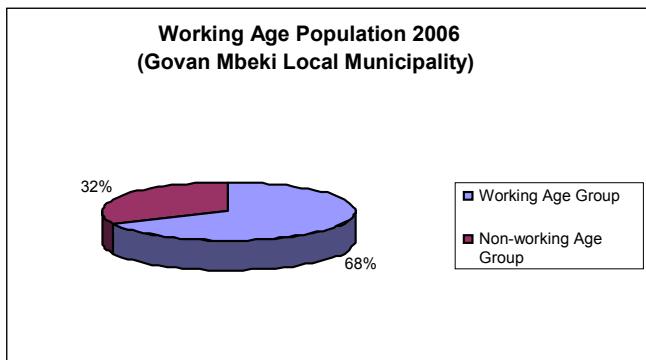

Source: Global Insight: Regional eXplorer 388

Ages	Percentage
15 – 34	35.8
35 - 64	24.8
65>	24.8
Total	100

Source: DWAF figures – April 2005

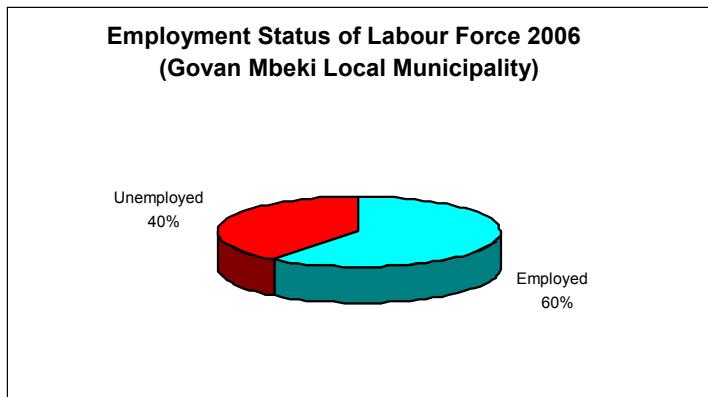

The tables reflect the huge number of people that need skills and capacity to support and sustain the municipality's economic growth and development. The challenge is also to redirect the available pool of potential labour force to acquire the needed technical skills to drive our economy.

(Chart 4)

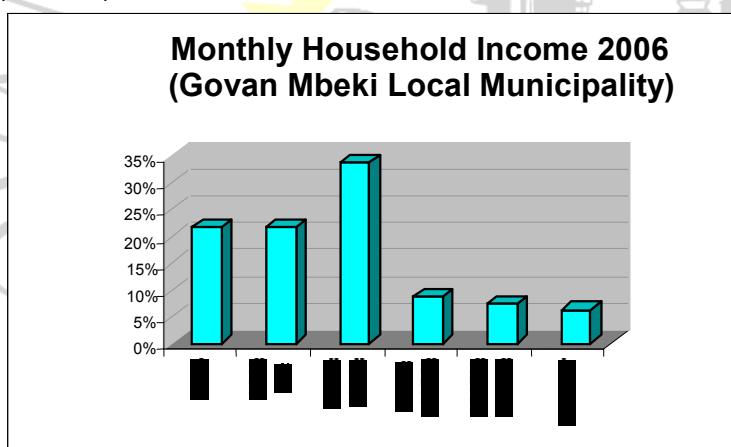

- 68 % of the total population falls within the working age group.
- 40 % of the economically active population is unemployed. This equates to a dependency ratio of 1:3.6 which is lower than the District's dependency ratio of 1:5.

(Chart 5)

- The key economic sectors within which the majority of the labour force is employed are mining and quarrying (19.9%), manufacturing (16.9%) and wholesale and retail at 13.5%.

(Chart 6)

- The model income is between R 8001.00 and R3200.00 per month whereas more than one in five households (21.6%) receives no monthly income.

In terms of the charts above, the challenges of creating more employment opportunities are a reality.

1.4.5 Tourism:

Municipality	GVA (R)
Govan Mbeki	121 640

Source: Global insight: Ricon (Pty) Ltd. Regional Economic Explorer Version 2.0c

The above table reflect the estimated contribution of the municipality to the regional economy and the province. There is still more the municipality can do expand its economic contribution through its economic growth and development strategy.

1.4.6 Mining and Quarrying:

Municipality	Mining and Quarrying (tons)
Govan Mbeki	4 186 523

Source: Global insight: Ricon (Pty) Ltd. Regional Economic Explorer Version 2.0c

The above table reflects the amount of mining and quarrying activities that takes place in Govan Mbeki Municipality.

1.4.7 Manufacturing – Labour Intensive:

Municipality	Manufacturing – Labour Intensive (personnel)
Govan Mbeki	10 969 693

Source: Global insight: Ricon (Pty) Ltd. Regional Economic Explorer Version 2.0c

The above table reflects number of the labour intensive personnel absorbed in the manufacturing sector. The main challenge for the municipality is the shortage of critical skills to support the major economic contributors; Petro- Chemical Industry and government institutions, to grow and sustain economic growth and development.

1.4.8 Construction and Infrastructure Projects:

Municipality	Number (R)
Govan Mbeki	1 146 799

Source: Global insight: Ricon (Pty) Ltd. Regional Economic Explorer Version 2.0c

The above table reflects the infrastructure investments made by the municipality in minimizing the infrastructure and construction backlog. The continuous contribution to its local economy through these investments is aimed at providing sustainable services and creating a conducive environment for economic growth and development.

Employment totals in 2007 and Annual Growth (% Constant 2000 Prices)

Sectors	Govan Mbeki	Gert Sibande	Annual Growth in GMM	Annual Growth in GSDM
Agriculture	2 968	34 861	2.6%	1.7%
Mining	17 521	29 054	-6.3%	-6.6%
Manufacturing	21 818	31 285	5.7%	-2.5%
Electricity	695	3 184	2.1%	-1.3%
Construction	5 991	13 649	25.1%	15.4%
Trade	21 849	45 153	8.5%	0.0%
Transport	3 821	8 720	11.1%	2.5%
Finance	4 642	8 912	14.8%	9.1%
Community Services	8 551	30 425	2.7%	2.7%
Households	6 071	16 334		
Total	93 928	221 576		

Source: Global insight: Ricon (Pty) Ltd. Regional Economic Explorer Version 2.0c

The table captured depicts the following viz fluctuation and stability in agricultural sector, decline in mining of gold and uranium ore, mining of coal and lignite.

Growth in the following sectors viz manufacturing, electricity, construction, trade, transport finance, community services

Poverty Indicators: Poverty Gap (Rmillion) in 2007

1.4.9 Communication Networks:

Service Providers	Number
No. of cellphone networks available	3
No. of internet services	15
Public phone services	40
Total	58

Source: Local Municipalities data

The above table reflects the different communication networks available in the municipality. These IT sectors need to further make investments in partnership with other stakeholders to increase access of such services to the rural communities.

1.5 FINANCIAL VIABILITY:

1.5.1 Revenue Breakdown:

GOVAN MBEKI LOCAL MUNICIPALITY						
Budget 2009-2010	Adjusted	Actuals	Projections	OPERATING REVENUE	Indicative 2010-2011	Indicative 2011-2012

Audit Statements for the past three financial years

Financial Year	Findings
2006/2007	Unqualified Report
2007/2008	Qualified Report
2008/2009	Unqualified Report

The above tables reflect the financial viability of the municipality and the capacity it has in order to ensure proper and effective service delivery.

The main focus of the investments will be:

- To address community needs
- To meet the millennium targets
- To create jobs
- To improve service delivery
- To improve communication and community participation

All communities will have access to clean water and decent sanitation by 2010. All houses will have access to electricity by 2012. Housing developments in particular inclusive development will ensure that people are located closer to places of work.

The municipality in partnership with the provincial department of housing will strive to put more resources to build more and better roads, infrastructure for water and sanitation, and schools and clinics where they are needed, in rural and urban areas alike. By using the approach of the expanded public works programme in providing infrastructure, we will strive to ensure that more people have work opportunities and are given skills.

Implement other special programmes in rural and urban areas where the poorest people live, including assistance in setting up food gardens and enviro-clubs and promotion and protection of the environment. Assist those who want to set up small businesses with skills, and other forms of support in partnership with SEDA. The municipality has strengthened its public participation by making Ward Committees more effective. Comprehensive consultations are done through the Integrated Development Plan (IDP) processes and budget process; Izimbizo forums to ensure effective consulting with communities.

The municipal IDP forums are functioning and ensure participation of all stakeholders. Some Provincial Department are assisting in the refinement of the IDP this augurs well for inter-sectoral collaboration.

The municipality will strive to facilitate partnerships to accelerate programmes for youth women empowerment (transversal issues), skills development and employment opportunities. The municipality will also strive to have a One Stop Government Centre [Thusong Service Centre] where citizens can get government services and information.

2. IDP PLANNING PROCESS:

2.1 ANALYSIS OF PROVISION OF SERVICE DELIVERY:

The Govan Mbeki still has a huge legacy in terms of addressing the basic needs of its community, much has been done to accelerate the provisions of free basic services and more people are enjoying the benefits of a new democracy and access to basic services.

The municipality notes also, due to its spatial nature, the main challenge is on ensuring that rural communities also enjoy the same rights and benefits as urban communities in terms of basic services, much is being done to provide water [bore holes] and sanitation [VIP toilets] in most farms despite the resistance by some farm owners. Continuous engagements will be used to resolve and address these challenges.

Access to free basic electricity and housing is still a major challenge, the level of access (roads & transport) to key service facilities (clinics, schools, government services, etc) need attention as the district is rural by its spatial nature.

2.1.1 Strategy:

Both the national and provincial government provide policy guidelines on handling service delivery issues/priority matters. The IDP representative forum assist the

institution to formulate jointly objectives on all priority issues and means of attaining the goals set , the targeted matters must be in line with the vision of the municipality, the same structure will ensure that a list of projects emanate from the strategy.

2.1.2 Projects phase:

The IDP representative forum must resolve on the following project proposal i.e. objectives, outputs, location, activities, timing, responsibility and funding.

2.1.3 Integration Phase:

The IDP representative forum must resolve on the following i.e. integrated institutional programme, consider the following sector plan viz disaster management plan, financial plan, spatial development framework, local economic development plan, performance management plan.

2.1.4 Approval Phase:

The draft copy of the IDP must be ratified by virtue of the council resolution, thereafter comments must be solicited from the community, district, sector department organised labour and organised business. Finally council must approve the final document taking into account comments if any emanating from the internal and external stakeholders. The final IDP must incorporate the budget.

2.1.5 National Spatial Development Perspective (NSDP):

The aforementioned strategic guide allows government wide planning to be possible given financial limitations and resource scarcities. The same strategy envisages tradeoffs between and across spheres of government.

National Spatial Development Perspective (NSDP) was launched by the Presidency in May 2003. The NSDP outline the national spatial development vision of government.

The vision and principles serve as a guide for meeting government's objectives of economic growth, employment creation, sustainable service delivery, poverty alleviation and the eradication of historic inequities including spatial distortions.

In essence the principles are intended to improve the functioning of the state principally to assist government in dealing with the challenges arising from the need to grow the economy and halving unemployment and the social transition (increase in number of households, growth in economically active population, massive migration, social consequences of social changes & social exclusion).

The NSDP link well with the following strategic documents viz; Integrated Development Plans (IDP) and Provincial Growth and Development Strategies (PGDS).

Government's national spatial development vision is as follows:

South Africa will become a nation in which investment in infrastructure and development programmes support government's growth and development objectives:

- By focusing economic growth and employment creation in areas where this is most effective and sustainable;
- Supporting restructuring where feasible to ensure greater competitiveness;

- Fostering development on the basis of local potential; and
- Ensuring that development institutions are able to provide basic needs throughout the country.

The basic principles of the NSDP underpinning this vision are:

- Economic growth is a prerequisite for the achievement of other policy objectives, key among which would be poverty alleviation.
- Government spending on fixed investment, beyond the constitutional obligation to provide basic services to all citizens (such as water, electricity as well as health and educational facilities), should therefore be focused on localities of economic growth and/or economic potential in order to attract Private-sector investment, stimulate sustainable economic activities and/or create long-term employment opportunities.
- Efforts to address past and current social inequalities should focus on people not places. In localities where there are both high levels of poverty and development potential, this could include fixed capital investment beyond basic services to exploit the potential of those localities. In localities with low development potential, government spending, beyond basic services, should focus on providing social transfers, human resource development and labor market intelligence. This will enable people to become more mobile and migrate, if they choose to, to localities that are more likely to provide sustainable employment or other economic opportunities.
- In order to overcome the spatial distortions of apartheid, future settlement and economic development opportunities should be channeled into activity corridors and nodes that are adjacent to or link the main growth centers.

The NSDP therefore uses the two crucial notions of need and potential to describe the space economy and thereby frame the parameters within which infrastructure investment and development spending are to be planned. In this sense the NSDP provides a concrete mechanism in terms of which integrated development planning in the local sphere, provincial planning and national spatial guidance can be formally linked in support of national priorities and objectives. The coordinated achievement of national objectives guided by the vision and principles of the NSDP as set out above; however is dependent on:

- Awareness of and buy-in to the NSDP vision and its principles by all organs of government;
- The linkage and alignment of the PGDS, IDPs, as well as sectoral, departmental and financial planning in all spheres of government;
- The extent to which the NSDP and its principles find practical manifestation in the PGDS, IDPs and sector department plans;
- Dialogue between spheres and between departments and institutions within spheres on development potential and poverty/need within particular localities;
- Annual comments and reports by organs of government on how their strategies are informed by the NSDP principles and their comments on the spatial narrative and maps in the NSDP.

The NSDP is not a plan but a perspective that acts as a policy co-ordination and indicative planning tool for all spheres of government. It is therefore characterized by an ongoing process of elaboration, refinement and revision that requires input from all three spheres of government. In this regard project teams are currently reviewing and updating the NSDP in three parallel projects:

- Key interventions for the harmonization and alignment of IDPs, PGDSs and the NSDP
- Updating Development Potential and
- Monitoring the Space Economy

2.1.6 The Millennium Development Goals (MDG's):

The Millennium Development Goals (MDG's) are eight goals to be achieved by 2015 that respond to the world's main development challenges. The MDG's are drawn from the actions and targets contained in the Millennium Declaration that was adopted by 189 Nations and signed by 147 heads of state and governments during the United Nations Millennium Summit in September 2000.

The MDG's are an agreed set of goals that can be achieved if all actors work together and do their part. Poor countries have pledged to govern better, and invest in their people through health care and education. Rich countries have pledged to support them, through Aid, debt relief, and fairer trade.

The 8 MDG's breakdown into 18 quantifiable targets that are measured by 48 indicators:

Objective 1: Develop a global partnership for development

- Address the special needs of the least developed countries
- Develop further an open, rule-based, predictable, non-discriminatory trading and financial system(includes commitment to good governance, development and poverty reduction- both internationally and nationally)
- Address the special needs of landlocked countries and small island developing states
- Deal comprehensively with debt problems of developing countries through national and international measures in order to make debts sustainable in the long run

Objective 2: Eradicate extreme poverty and hunger

- Reduce poverty by half between 1990 and 2015, proportion of people whose income is less than US\$1 a day
- Halve, between 1990 and 2015, the proportion of people who suffer from hunger

Objective 3: Achieve universal primary education

- Ensure that, by 2015, children everywhere, boys and Girls alike, will be able to complete a full course of primary schooling

Objective 4: Promote gender equality and empower women

- Eliminate gender disparity in primary and secondary education preferably by 2005 and in all levels of education no later than 2015

Objective 5: Reduce child mortality

- Reduce by two-thirds, between 1990 and 2015 , the under-five mortality rate

Objective 6: Improve maternal health

- Reduce by three quarters, between 1990 and 2015, the maternal mortality rate

Objective 7: Combat HIV/AIDS, Malaria and other diseases

- Have halted by 2015, and begin to reverse the spread of HIV/AIDS
- Have halted by 2015, begin to reverse the incidence of malaria and other major diseases

Objective 8: Ensure environmental sustainability

- Integrate the principles of sustainable development into country policies and programmes and reverse the loss of environmental resources
- Halve, by 2015, the proportion of people without sustainable access to safe drinking water
- Achieve significant improvement in lives of at least 100 million slum dwellers, by 2020
- In cooperation with developing countries, develop and implement strategies for decent and productive work for youth
- In cooperation with pharmaceutical companies, provide access to affordable drugs in developing countries
- In cooperation with private sector, make available the benefits of new technology, especially information and communications

2.1.7 Provincial Growth and Development Strategy (PGDS):

Another important government initiative implemented during the past few years is the Provincial Growth and Development Strategy programme. The Provincial Growth and Development Strategies were compiled within the parameters set by the National Spatial Development Perspective, as well as the Integrated Sustainable Rural Development Strategy as defined by national government.

A PGDS is a “strategic and integrated provincial development plan that provides direction and scope for province-wide development programmes and projects, within the context of a long-term perspective and taking into consideration resources available and constraints.” Furthermore, a PGDS provides “a spatially referenced framework for both public and private sector investment, indicating areas of opportunity and development priorities and enabling intergovernmental alignment.” In essence then, the Provincial Growth and Development Strategies are aimed at providing strategic directives to District and Local Municipalities in formulating their more detailed Integrated Development Plans (IDPs), and Spatial Development Frameworks (SDF). It is thus essential that the issues and directives emanating from PGDSs’ be compatible with the vision, priority areas, and guidelines of SDFs of local and District municipalities.

Flowing out of a thorough SWOT analysis and identified trends, the Province has identified six priority areas of intervention as part of the PGDS, namely:

- Economic Development (i.e. investment, job creation, business and tourism development and SMME development);
- Infrastructure Development (i.e. urban/rural infrastructure, housing and land reform);
- Human Resource Development (i.e. adequate education opportunities for all);
- Social Infrastructure (i.e. access to full social infrastructure);
- Environmental Development (i.e. protection of the environment and sustainable development); and
- Good Governance (i.e. effective and efficient public sector management and service delivery).

In line with strengthening the intergovernmental planning system and to ensure that there is sustainable growth and development in the province, the PGDS has adopted the following as guiding posts:

- Internationally, the United Nation’s Millennium Development Goals (MDGs); and

- Nationally, the Accelerated and Shared Growth Initiative for South Africa (ASGISA) and the National Spatial Development Perspective (NSDP) of South Africa

2.1.8 Accelerated Shared Growth Initiative of South Africa (ASGISA):

The mandate by the South African government in 2004 to half poverty and unemployment by 2014 resurrected commitment in the public sector delivery trajectory.

Dismal malfunction of the previous highly contentious GEAR to address economic Backlogs resulted in the formation of a new economic strategy today known as AsgiSA.

The South African government's AsgiSA aims to guide and improve on the country's remarkable economic recovery, raising economic growth to 6% and halving poverty and unemployment by 2014. AsgiSA is a micro-economic strategy that strives to accelerate growth. It is a national shared growth initiative that was informed by extensive consultation from all sectors. The two main objectives of AsgiSA include:

- To align its efforts by halving poverty by 50% in 2014; and
- To realize annual growth rates that averages 4.5% or higher between 2005 and 2009 and average growth rate of at least 6% of gross domestic product (GDP) between 2010 and 2014.
- AsgiSA is also informed by the following binding constraints that have been identified as major stumbling blocks to growth and require commitments based on uprooting them:
 - Continuous instability and level of currency;
 - The cost, efficiency and capacity of the national logistics system;
 - Lack of suitably skilled labor amplified by the impact of apartheid spatial patterns on the cost of labor;
 - Obstacles to entry, limits to competition and limited new investment opportunities;
 - Regulatory environment and the burden on small and medium businesses; and
 - Deficiencies on state organization, capacity and leadership.

Interventions responding to the binding constraints include:

- *Infrastructure programmes*: aimed at improving the availability and reliability of infrastructure services in response to rapidly growing demand through the municipal and provincial infrastructure grant programmes;
- *Sector investment (or industrial) strategies*: To promote private-sector investment, sector investment programmes that are identified include tourism, agriculture, manufacturing, mining and business process outsourcing programmes;
- *Second economy interventions*: Government has already initiated interventions to address deep-seated inequalities and target the marginalized poor, to bridge the gap with the Second Economy, and ultimately to eliminate the Second Economy. One key mechanism is to use the leverage of the First Economy to address the Second Economy. This includes leveraging the increased levels of public expenditure through promotion of small businesses, broad-based empowerment and development of Sector strategies;
- *Macro-economic issues*: The development of a new capital expenditure management information system by the National Treasury was recently

introduced to address the issue of poor expenditure and budgeting at macro level;

- *Public administration issues*: The focus of this intervention is to realize a people's contract on economic matters, the effective implementation of agreed BEE Charters and leveraging benefits from offsets. On local government and service delivery, focus is placed on addressing the skills problems through Project Consolidate; and
- *Skills and education initiatives*: Skill shortages have been an impediment on infrastructure programmes and private sector investment. The AsgiSA response ranges from medium-term educational interventions to raise the level of skill in areas needed by the economy, to immediate measures to acquire skills needed for the implementation of AsgiSA projects. Programmes identified by AsgiSA to address the skills and education backlog include the QUIDS-UP programme, the Maths and Science (Dinaledi) Programme and the Joint Initiative for Priority Skills Acquisition (JIPSA).

JIPSA is tasked to identify urgent skills needed and to provide feasible, sound and effective remedies. Major remedies include special training programmes, attracting South Africans currently working abroad, bringing back retirees, mentoring and overseas placement of South African trainees to fast track their development and encouraging highly skilled emigrants back into the mainstream employment.

2.1.9 Integrated Sustainable Development Rural Strategy (ISDRS):

Countless efforts by the South African government to undertake joint ventures with an assortment of stakeholders had assumed multiple instruments. One of the recent instruments is the ISRDS aimed at enhancing opportunities and well-being of rural people.

ISRDS is defined as a federal policy designed to realize a vision that will "attain socially cohesive and stable rural communities with viable institutions, sustainable economies and universal access to social amenities, able to attract and retain skilled and knowledgeable people, who are equipped to contribute to growth and development". The ISRDP calls for the progressive coordination and integration of programmes by various government departments and stakeholders to maximize the development of rural communities. This vision is a radical one in that it envisages transformed rural economies, which move away from subsistence economic activities. Local government is the point of delivery and the implementation of the ISRDP. Specifically, the implementation process aims to strengthen the quality of Integrated Delivery Plans (IDPs) and the delivery of these IDPs.

The vision of ISRDP is informed by four elements, which include:

- *Rural development*: going beyond just the poverty alleviation connotation, but focusing on changing rural environments to create enabling platforms for people to earn more and to invest in themselves and their communities. This emphasizes that rural people must be the masters of their own destiny and to survive and improve their own economic packages within their environments;
- *Sustainability*: sustainability evolves from increased local growth, with people enjoying own gains and maintaining available resources for future development;
- *Integrated*: this calls for coherent coordination across traditional sectors in all spheres of government. It requires the Municipal five year plan (IDP) to establish coordination and maintain integration at the municipal sphere; and

- *Rural Safety net*: in responding to the continuous crisis facing rural people, social assistance has been extended to all rural people and the ISRDP is also consolidating that effort.

2.1.10 Land Redistribution for Agricultural Development (LRAD):

Land reform encompasses three distinct components, namely the restitution, tenure reform and the redistribution programmes. The redistribution programme, in turn, has different components, or 'sub-programmes', which includes:

- *Agricultural Development*: to make land available to people for agricultural purposes;
- *Settlement*: to provide people land for settlement purposes; and
- *Non-agricultural enterprises*: to provide people land for non-agricultural enterprises, for example eco-tourism projects.

LRAD has two distinct parts. Firstly, LRAD deals with the transfer of agricultural land to specific individuals or groups. Secondly, LRAD deals with commonage projects, which aim to improve people with access to municipal and tribal land, primarily for grazing purposes.

The strategic objectives of the sub-programmes include:

- Contributing to the redistribution of 30% of the country's agricultural land over 15 years;
- Improving nutrition and incomes of the rural poor who want to farm on any scale;
- De-congesting over-crowded former homeland areas; and
- Expanding opportunities for women and young people who stay in rural areas.

2.1.11 Water Provision:

Estimated Backlog on Bulk Infrastructure

Water no. of household	Sanitation No. of household	Est. Rural Water & Sanitation Backlog
980	6 510	807

Source: GSDM – WSDP May 2006

The challenge during the current financial year is to ensure that the backlog is addressed in order to be in line with the set millennium targets.

Proclaimed formal areas with access to water

No. of households	No. of households with access	Estimated Backlog
69 167	64 735	1787

Source: DWAF Figures – April 2005

In support of the Provincial Flagship projects, Govan Mbeki Municipality needs to engage the Department of Local Government and Housing in addressing the backlog and utilise local labour in doing so.

Types of access to water (GMM 2008):

Type of Service	Govan Mbeki Municipality
In-house	38 047
Yard connection	26 688
Bore Holes	116
Spring	18
Rain water tank	69
Dam / Pool	92
Rivers / streams	86
Vendor	58
Other	1 265

Source: GSDM WSDP 2008

The municipality plans to ensure that all residents have access to clean water by 2010.

Residential Consumer Units: Water

No. of Consumers units with:	Urban	Rural: Dense	Rural: Village	Rural: Scattered	Rural: Farmland
None / inadequate	9 613	7 500	6 000	2 300	11 907
Communal Water Supply	17 014	12 803	3 803	284	6 202
Uncontrolled volume supply: yard tap / house connection	139 713	7 016	5 033	155	33 786
Total served (2+3+4)	156 728	19 819	8 836	439	39 988
Total (1+5)	166 341	21 796	12 183	1 238	51 962

Source: GSDM WSDP – May 2006

It is very crucial for all water supplies to be regulated and measured, which will further determine the water loss in a quantitative manner.

2.1.12 Sanitation:

Municipality	Population
Govan Mbeki	221 747

Source: Population StatsSA 2006

In order to meet the set millennium targets of 2010, the municipality has to set targets of total bucket eradication and ensuring that all inhabitants have access to proper sanitation by the end of 2007.

Proclaimed areas with access to sanitation

No. of households	Bucket system before 2004	Buckets eradicated	In-process of eradication	Households below RDP standards (rural)
69 167	7 865	5300	4518	228

Source: DWAF figures – April 2005

The above table reflects the number of people with access to sanitation in proclaimed areas. The current backlog to provide water and sanitation in line with the millennium goal is a challenge to the municipality and for the municipality to be able to reach these goals it will have to get more resources from all stakeholders.

2.1.13 Electricity:

Proclaimed areas with access to electricity

Approach	No. of households	Registered indigents	FBE: Municipality	FBE: Eskom	Estimated Backlog
Broad-based	69 167	17 259	53 223	8 000	12 906

Source: DWAF figures – April 2005

Through PPP with ESKOM the municipality seeks to achieve the set targets of FBE to all residents.

2.1.14 Housing:

Proclaimed areas with access to housing

Unit Allocations (2000 – 2005)	Estimated backlog on housing units needed	Estimated Rural Backlog
11 044	28 000	1 181

Source: DLG & H figures – April 2005

Housing backlog will be addressed through the Department of Local Government and Housing within the municipal area.

The SDF makes it possible for future developments within the municipality. The LUMS encourages the further town developments.

2.1.15 Roads:

Municipal Roads

Status	Govan Mbeki Municipal Roads
Total Km	1050 km
Improvements per Km from 2000	25,95 km
Budget spent since 2000	R45,701 Million
Informal areas	90,4 km
Gravel roads	555 km
Tarred roads	495 km
Unpaved to be converted	555 km
Paved Roads to be Upgraded	311 km
Funding needed for upgrading	R338 million

Source: Source: GMM PMS - November 2008)

The challenge for the municipality is to continuously maintain roads and pave or tar gravel roads.

2.1.16 Health Facilities:

(Table 16)

Facilities	Govan Mbeki
------------	-------------

Private Hospitals	2
Primary Health Clinics	10
Mobile Clinics	4
Government Hospitals	2

Bethal	28 852	87 972	1 222 286
Evander	20 299	38 453	569 491
Leandra	10 821	38 453	419 861
Secunda	80 464	203 880	3 310 035
Kinross	12866		
Govan Mbeki	153 302	371 297	5 506 073

Waste Quantities

Waste quantities generated and categories of waste are important in order to devise a plan for waste collection and determine the staff numbers that are needed. From the population sizes above Govan Mbeki is expected to have the highest waste quantities.

In the municipality waste is divided into the following categories:

- Domestic;
- Building Rubble;
- Garden;
- Hazardous; and
- Industrial

The table below shows the 2005 waste quantities per category:

(Table 18d)

Domestic (Tons per month)	Building rubble (Tons per month)	Garden (Tons per month)	Hazardous (Tons per month)	Industrial (Tons per month)	Total Waste produced (Tons per month)	Total Waste Produced (Tons per annum)
12 525	1442	22377	*0	86	36430	437160

* Hazardous waste within the municipality is handled by private contractors.

Using the tons per annum column, the table above shows that Govan Mbeki produces 65% of the Gert Sibande District Municipality's total waste per annum.

In terms of GSDM Integrated Waste Management Strategy will in partnership with local municipalities, private sector and civil society strive to partner to achieve the following goals.

- Waste Minimization
- Waste Management and improved service delivery
- Waste control and eradication awareness
- Efficient waste management (Planning and Control)

Number of Formal Households with access to Waste Collection

(Table 18e)

Level of Service	No. of Households	No. of Households serviced (formal)	No. of Households serviced (informal)	Challenges
Household removal once a week using compactors, tractors with trailers and 45 X 6m skips	69 167	31 042	2 043	Financial resources, inadequate equipment and unregistered land fill sites.

Source: GSDM IWMP figures – April 2005

Estimated budget to eradicate waste management backlogs

(Table 18f)

Type of Settlement (R million)	Type of Service (R million)	Total (R million)	%
80 510	52 297	35 164	97 644

Intensive programmes are in the pipeline to address the backlogs of waste management in partnership with all relevant stakeholders.

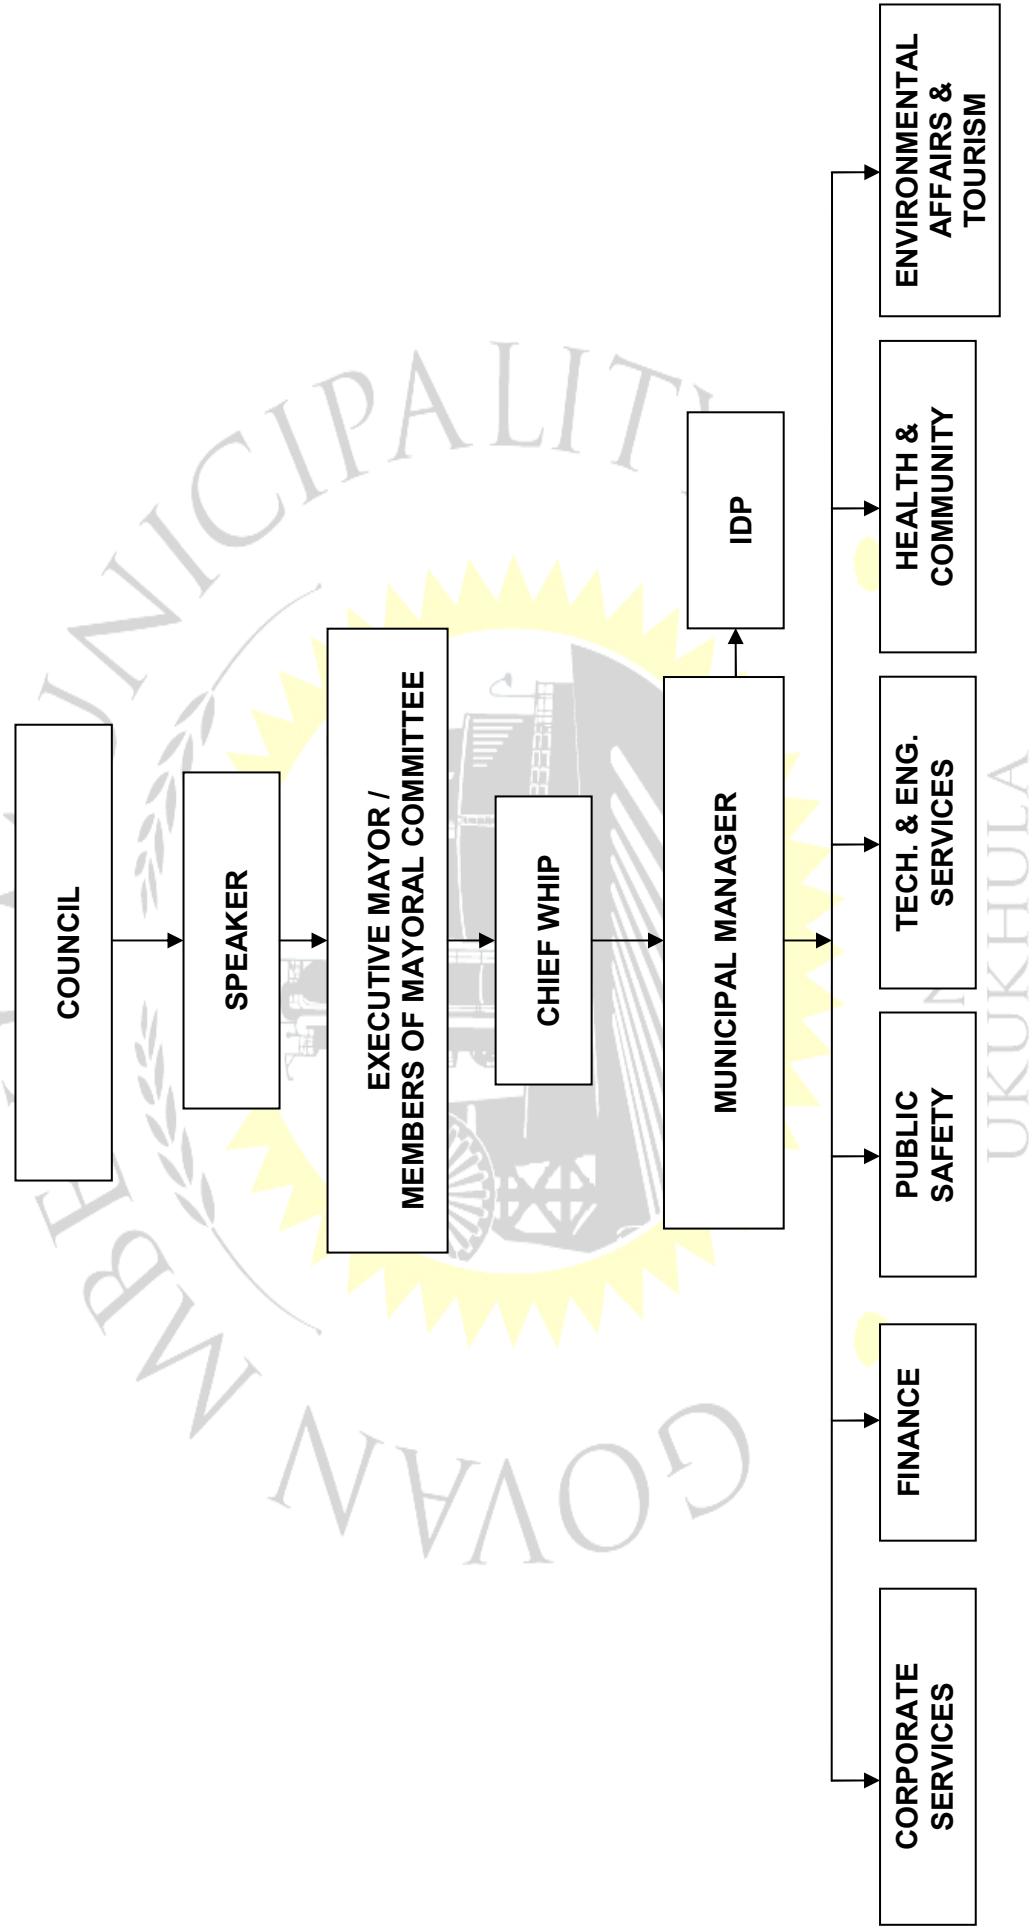

2.2 INSTITUTIONAL CHALLENGES AND SWOT ANALYSIS:

(Table 19)

Strengths	Weaknesses
Experienced, Competent Workforce	Lack of motivation.
Community Participation	Poor Attendance of meetings in historically urban areas Communication
Technical Expertise	Lack of a proactive maintenance plan. Old / obsolete infrastructure
Broad Tax Base	Increasing indigent households and increasing unemployment rate / slow development
Service Delivery Systems and Mechanisms	Over reliance on outside service providers
Potential Growth in LED	Pending finalisation of Local Economic Development Strategy

Opportunities	Threats
Economic Development and Growth on identified economic nodes in line with the provincial growth and development strategies Opportunities on downstream development / industrial development demands to meet the petrol chemical expansion needs.	Lack of Coordination, Integration & Implementation/ absence of local economic development strategies / lack of comprehensive investment packages or incentives Uncoordinated initiatives and support from major stakeholders.
Stakeholders Participation on community development, job creation and social responsibility projects.	Competition among stakeholders
Community input & support on economic development, social development and service delivery.	HIV/AIDS pandemic & Social Instability / increase population and service delivery demands / unavailability of land for development due to under mining.
Business Support & Participation in the growth and development of local economy and SMME's	Lack of Integration and Support for BBBEE & SMME's, exploitation of opportunities by people outside the municipality and district to the detriment of local communities.

2.3 GOVAN MBEKI ORGANISATIONAL STRUCTURE

2.4 GOVAN MBEKI OBJECTIVES AND STRATEGIES:

Priority Areas	Implementing Strategy and Priority Issues
<i>Intergovernmental Relations, Social & Community Services</i>	<ul style="list-style-type: none"> • The municipality will facilitate community development and participation through Mayoral Izimbizo, LED Forums, and IDP Forums. • GSDM in participation with provincial departments will support GMM to provide disaster, fire and emergency management through training, infrastructure development, equipment and fleet. • GSDM and GMM in partnership with Sports and Recreation will promote and support development of Sports and Recreation within the municipal jurisdiction through provision of infrastructure, sports, arts and culture programmes. • GMM will partner with civil society, NGOs, CBOs to facilitate and provide support for HIV/AIDS programmes and projects. • GMM in partnership with GSDM and sector departments and the private sector will support the provision of Community Services through infrastructure and support programmes. • GMM municipality will in partnership with all stakeholders facilitate and contribute towards the development of skills and provision of training to enhance the municipal to have a pool of skills needed to support government and economic development. • GMM in partnership with GSDM and other stakeholders and the government will promote and support tourism initiatives and developments. • GMM will attract skilled experienced staff to assist in coordinating the efforts of the municipality, district, other spheres of government and private sectors.
<i>Management and Corporate Services</i>	<ul style="list-style-type: none"> • GMM will strive to support its service delivery mechanisms through effective and efficient administration (Council and Mayoral Services). • GMM will strive to provide effective and efficient Human Resources. • GMM will strengthen its accountability and transparency through its Communication and Marketing strategies and programmes. • GMM will strive and contribute to Youth, Gender and Disability development programmes and projects as initiated by GSDM. • GMM will strive to implement efficient and effective Information Technology (GIS).
<i>Planning and Economic Development</i>	<ul style="list-style-type: none"> • GMM will strive through the Integrated Development Plan that is aligned to Provincial Growth Strategy, to address the following development priorities: <ul style="list-style-type: none"> • Provision of Bulk Water and Sanitation Infrastructure. • Facilitate provision of electricity. • Provision of efficient transport network (airports,

Priority Areas	Implementing Strategy and Priority Issues
	<p>rail and roads)</p> <ul style="list-style-type: none"> • Provision of integrated waste management • Provision of integrated environmental plan <p>GMM will strive through its Town and Regional Planning initiatives will support the following key objectives:</p> <ul style="list-style-type: none"> • Formalize and Protect a Municipal Wide, Linked Open Space System • Promote A System of Functionally Defined Activity Nodes/Areas • Optimize Linkages and Connectivity • Strengthen Existing Urban Areas and Nodes • Promote High Density Mixed-Use Development Along Main Linkages • Focus Upgrading on Previously Disadvantaged Township Areas • Feasibility studies for development of Agri-villages • Integrated land use management systems • Spatial Local Economic Development (Economic Development Nodes) • Facilitate Township Establishment • Regional planning for sports centres, landfill sites, cemeteries and fresh produce markets • Feasibility studies for future developmental needs (Housing, water, sanitation, transport, community facilities, economic nodes and tourism). <p>GMM and GSDM in partnership with other government spheres and the Traditional Authorities will facilitate and support the following:</p> <ul style="list-style-type: none"> • Land reform and land administration • Economic development and Integrated Rural Planning
<i>Water and Sanitation Services</i>	<ul style="list-style-type: none"> • GMM will, in partnership with the other spheres of government through GSDM, support and capacitate the establishment and support of water services authorities through the following: <ul style="list-style-type: none"> • Water quality control and monitoring • Lab Development • Water Services Development Plans • Water Loss Management • Institutional Development and Capacity Building
<i>Municipal Transformation and Organisational Development</i>	<ul style="list-style-type: none"> • GMM will through its Budget and Treasury office guide the compliance to all MFMA requirements and regulations, including its Audit Committee. • A new organisational structure will be formulated to respond to all the municipal service delivery challenges • All the section 57 Employees have signed performance management contracts. • The Municipality has appointed 3 female as part of senior management team
<i>Proposed Shared Services</i>	<ul style="list-style-type: none"> • GMM will with the support of GSDM strengthen its local administration and strive to create a platform that will facilitate capacity building and support in the following

Priority Areas	Implementing Strategy and Priority Issues
	<p>key areas:</p> <ul style="list-style-type: none"> • Internal Audit Services • Human Resources Management • Integrated Spatial Planning • Coordination of Service Delivery Mechanisms • Project Management • Municipal Health & Disaster Management Services
<i>Infrastructure and Technical Services</i>	<ul style="list-style-type: none"> • GMM will, through partnerships and support of GSDM and the private sector and other spheres of government will strive to provide: <ul style="list-style-type: none"> • Bulk infrastructure Provision (Planning and Implementation) • Project Management and Implementation • Infrastructure Maintenance and Development • Housing (planning and support) • Technical Support
<i>Local Economic Development</i>	<ul style="list-style-type: none"> • A draft Led Strategy document has been formulated.
<i>Municipal Financial Viability and Management</i>	<ul style="list-style-type: none"> • The municipality has in place the following policies: <ul style="list-style-type: none"> • Rates policy, • Indigent Policy • The 2007/08 financial statements submitted to the Auditor General receive an unqualified audit report. • The municipality has formally adopted a policy on Preferential Procurement and all the required supply chain management committees have been established. • The municipality has formally adopted a policy on anti-corruption with a hot line number that is widely branded from the municipal building and marketing paraphernalia.
<i>Good Governance and Public Participation</i>	<ul style="list-style-type: none"> • The municipality has formalised its public participation structures as captured on the IDP Process Plan. • As part of Good Governance a workshop was conducted on the Batho Pele principles and are they currently displayed throughout the municipal offices.

Support Delivery Strategies include:

- Development of LED and Tourism Strategy and LED plan by GMM, which will focus on the areas identified in the District Spatial Framework Plan and GMM SDF on areas with economic opportunities. The Municipality has lots of potential in this regard and the strategy outlines how these opportunities can be strengthened and ensures sustainability is reached and maintained. Poverty alleviation initiative will also be highlighted by the strategy. These will be implemented in line with Sector Department's partnership with all stakeholders including the national programmes such as ASGISA.,
- GMM as a water authority will develop and strengthen Water Service Development Plans.
- Ensure total eradication of buckets and proper sanitation to all inhabitants by the end of 2008.

- Develop long-term capital development plans.
- Strengthen Inter-Governmental Relations
- Improve community participation and communication.

2.5 ROLES AND RESPONSIBILITIES

Structure	Terms of Reference / Roles and Responsibilities
<i>Executive Mayor and Mayoral Committee</i>	<p>The Mayoral Committee must:</p> <ul style="list-style-type: none"> • Decide on the Process Plan for IDP Review • Responsible for overall political direction of the IDP process, and may assign responsibilities to the Municipal Manager • Submit review IDP framework and draft IDP to Council
<i>Municipal Manager with delegated powers to the IDP Manager</i>	<p>The Municipal Manager is responsible for the management and co-ordination of the preparation and of the IDP process which include but not limited to the following:</p> <ul style="list-style-type: none"> • Responsible for the day to day management of the planning process plan; • Responsible for the day to day management of the planning process and ensuring that timeframes are being adhered to and resources are managed effectively and efficiently; • Co-ordinate the involvement of all different role players; • Ensuring the horizontal and vertical alignment in the process, including Sectors; • Ensure that the links between the processes of performance management, monitoring, evaluation and review are maintained; • Ensuring the horizontal and vertical alignment in the process, including Sectors Departments Strategic Plans; • Ensure that the links between the processes and procedures of performance management, monitoring, evaluation and review are maintained; • Ensuring compliance with National and Provincial requirements, legislations and IDP Guide Packs; • Ensure appropriate participation; • Ensure proper documentation of outcomes; • Chairing the Steering Committee, Extended Technical Committee; and • Management of consultants. • Apply for external funding / donors
<i>Municipal Council</i>	<ul style="list-style-type: none"> • The Municipal Council will have a final say / comment and approval of the reviewed IDP. • Will consider the process plan which should set out the process for the IDP Review. • The Executive Mayor or Member of the Mayoral Committee designated by the Executive Mayor to formally submit to the municipal council a proposal to amend the IDP and also give reasons why it should be amended • Considers and adopts revised IDP in line with budget

Structure	Terms of Reference / Roles and Responsibilities
<i>IDP Technical Committee / Steering committee</i>	<ul style="list-style-type: none"> • Approve organogram • Provides terms of reference for the various planning activities • Commissions research studies or investigations • Considers and comments on: <ul style="list-style-type: none"> • Inputs from sub-committee/s, study teams and consultants • Inputs from provincial sector departments and support providers • Analyse inputs from stakeholders
<i>IDP Representative Forum</i>	<ul style="list-style-type: none"> • Inform affected and interested groups, communities and organisations, on relevant planning activities and their outcomes; • Analyse issues, determine priorities, negotiate and reach consensus; • Participate in the designing of project proposals and/or assess them; • Make recommendations on planning issues to the municipal council

2.6 MUNICIPAL INTEGRATION WITH SECTOR DEPARTMENTS AND KEY ROLE PLAYERS:

Role Players	Roles and Responsibilities
<i>Municipal Council</i>	<ul style="list-style-type: none"> • The Municipal Council will approve the reviewed IDP. • Will consider the process plan which should set out the process for the new IDP cycle.
<i>Executive Mayor and Mayoral Committee</i>	<p>The Executive Mayor must:</p> <ul style="list-style-type: none"> • Decide on the Process Plan for IDP Review • Responsible for overall management, co-ordination and monitoring of the review process, and may assign responsibilities to the Municipal Manager • Submit review IDP framework and draft IDP to Council • Develop terms and criteria for Representative Forum. • Give political direction
<i>Municipal Manager with delegated powers to the IDP Manager</i>	<p>The Municipal Manager is responsible for the management and co-ordination of the preparation and of the IDP process which include but not limited to the following:</p> <ul style="list-style-type: none"> • Responsible for the day to day management of the planning process plan; • Responsible for the day to day management of the planning process and ensuring that timeframes are being adhered to and resources are managed effectively and efficiently; • Co-ordinate the involvement of all different role players;

Role Players	Roles and Responsibilities
	<ul style="list-style-type: none"> • Ensuring the horizontal and vertical alignment in the process, including Sectors; • Ensure that the links between the processes of performance management, monitoring, evaluation and review are maintained; • Ensuring the horizontal and vertical alignment in the process, including Sectors; • Ensure that the links between the processes of performance management, monitoring, evaluation and review are maintained; • Ensuring compliance with National and Provincial requirements, legislations and IDP Guide Packs; • Ensure appropriate participation; • Ensure proper documentation of outcomes; • Chairing the Steering Committee, Extended Technical Committee; and • Management of consultants.
<i>IDP Steering Committee</i>	<ul style="list-style-type: none"> • Process Plan management body; • Allocation of duties and monitoring; • Overall management including the appointment of technical consultants; • Decision on roles and responsibilities; • Identification of consultation with other role-players/adverts; • Manage draft action programme; • Commission research studies and recommend appointment of service providers; • Decide on matters to be referred to the extended to the extended technical committee for alignment and integration.
<i>IDP Representative Forum</i>	<ul style="list-style-type: none"> • The Executive Mayor or Representative chair the forum meeting. • The HODs, CBO's, NGO's, Business Forums, Community Forums, Youth, Woman Organisations, Political parties, Disabled and Traditional Leadership. • This Forum consist of community participation structure/stakeholders and are to represent the interests of all stakeholders and ensure proper communication to guarantee representative participation during the review process; • Will provide an organizational mechanisms for discussion, negotiations and decision making between the stakeholders including municipalities and government departments during the review process; • Monitor the performance of the planning and implementation process. • Make recommendations to the council on planning and development priorities.
<i>IDP Management Committee</i>	<ul style="list-style-type: none"> • Will be chaired by the Municipal Manager / IDP Manager. Consists of heads of departments as well

Role Players	Roles and Responsibilities
	<p>as representatives from sector departments.</p> <ul style="list-style-type: none"> • Will deal with matters relevant and relating to district wide issues; • Consider municipal wide programs and integration to PGDS; • Consider and advise the Steering Committee on the evaluation of sector plans; • Attend to the alignment of the Municipality's IDP to that of the GSDM; • Deliberate on inter sectoral programs and recommendations to the Representative Forum; • Give advise to the municipality and foster sectoral alignment; and • Will timeously and report on progress which then be forwarded to the Steering Committee
<i>PIMMS Centre (Gert Sibande District)</i>	<p>PIMS will provide the following functions:</p> <ul style="list-style-type: none"> • Provide methodological guidance and support the municipality during the IDP implementation and review as well as other planning processes; • Support the planning and implementation management process of the municipality; • Establish and maintain close links with public and private service providers for proper programme alignment in municipal planning; • Provide information to the municipality on relevant national and provincial policy and legislative frameworks; • Organize/conduct relevant training events for the municipality to build its planning and implementation management capacity; • Liaise with donors and other state agencies for funding for the municipality.
<i>Traditional Leaders</i>	<ul style="list-style-type: none"> • Amakhosi / Izinduna should work with close councillors on identifying priority issues. • Facilitate community consultation in collaboration with ward councillors.
<i>Mayoral Outreach</i>	<ul style="list-style-type: none"> • Through road shows / outreach programmes to get community inputs and provide feedback.
<i>Ward Committees</i>	<ul style="list-style-type: none"> • Consulted via the Executive Mayoral Outreach.
<i>CBWs / NGOs / CDWs</i>	<ul style="list-style-type: none"> • To provide vital information and support during planning, evaluation, monitoring through the Representative Forum.

2.7 DEPARTMENT CO-OPERATIVE GOVERNANCE AND TRADITIONAL AFFAIRS COMMENTS ON 2007-2011 IDP:

The Department of Co-operative Governance and Traditional Affairs acknowledged the receipt of the 2009/10 IDP as adopted by council on the 29 May 2009, furthermore the municipality did comply with section 32 (1) of the Local Government Municipal Systems Act, No 32 of 2000 which stipulates the following "The Municipal Manager must submit a copy of its Integrated Development Planning to the MEC in the Province within (10) days of the adoption".

The IDP was assessed against the following Viz;

- Compliance in relation to Chapter 5 of the Local Government Municipal Systems Act No. 32 of 2000.
- Technical assessment in terms of the quality and presentation of the information in the IDP.
- Alignment of the IDP with the PGDS.

The following issues are emphasised VIZ; submission of the IDP to be accompanied by a process plan , the municipality manage to provide an analysis of its sector plans with council resolution numbers and status quo of all its plans. The municipality must finalised all its outstanding plans, the notices for public meetings should be captured on the IDP,. The acknowledged that the IDP does clearly outline the municipal key delivery priorities.

The Department also noted with concern the lack of support and participation by sector departments. The municipality was advised to consider ward/community based planning to enhance public participation in its affairs.

Finally the municipality was commended for its commitment to tackling service delivery challenges for the improvement of the lives of the communities.

Response from Govan Mbeki Municipality:

Govan Mbeki Municipality, in addressing the comments raised by HOD Co-operative Governance and Traditional Affairs in 2009, has committed itself and completed the following:

- Council adoption of the Ward based model of planning
- All the planning phases will be captured on the document
- Copies of the Process Plan will be forwarded to the department
- Information on community consultation will form part of the document

2.8 GERT SIBANDE DISTRICT MUNICIPALITY ASSESSMENT COMMENTS:

No comments /issues were received from the Gert Sibande Municipality following the submission of the 2007-2011 IDP.

2.9 PROCESS OVERVIEW:

2.9.1 Analysis Phase:

The municipality during its analysis put emphasis on the following key issues as baseline information to prepare for planning:

1. Statistics from Global Insight

2. Progress made from previous projects and programs [infrastructure projects]
3. Services Backlog Data
4. Sector Departments comments
5. Issues rose during the review by the ward committees and community development workers, business and other stakeholders
6. DPLG comments on IDP

2.9.2 Consultative Forums and Mechanisms for Community Participation used by the municipality:

1. Echo
2. Ridge Times
3. Ekasi News
4. Ikwekwezi FM
5. Imbizos
6. Ward Meetings
7. Sector Departments Consultation
8. Website (www.govanmbeki.gov.za)

2.10 INSTITUTIONAL ARRANGEMENTS, ROLES AND RESPONSIBILITIES:

There are six departments in the municipality namely:

1. Financial Services:

This department will focus on municipal budgets, accounting, financial management and supply chain management issues.

2. Technical and Engineering Services:

This department focuses on infrastructure development and maintenance, projects, provision of bulk services, project management and policy development, supply as well as develop partnerships to fulfil water services functions as a water authority.

3. Public Safety:

This department focuses on traffic services, disaster management and fire rescue, licensing and registration, mechanical workshop, police services, emergency services, public transport infrastructure, rail and air infrastructure, goods and freight infrastructure and transport services.

4. Corporate Services:

This department focuses on administration, human resources, legal matters and labour relations management services, information technology, etc.

5. Environmental Affairs and Tourism:

This department focuses on cemeteries, landscaping, grass cutting, sports field development and maintenance, environmental impact assessments, environmental education, culture, sports, arts and recreation, tourism and libraries, etc.

6. Health and Community Services:

This department focuses on Primary Health Care Services, emergency health services, mental health and substance abuse, health promotion and awareness, rehabilitation, food safety and security, occupational health and safety, environmental health and specialised services, business licenses, etc.

2.11 ADOPTION AND REVIEW OF THE IDP:

The Municipality will on an annual basis during August to November engage in consultation with its communities and key stakeholders to review the IDP, the following will be the key issues to be reviewed annually:

1. Service Delivery Mechanisms
2. Projects and Programs [MTF]
3. Community inputs
4. Institutional arrangements & capacity
5. Financial Resources
6. Stakeholders
7. Performance of the municipality against KPA's
8. Sector Departments progress / programs and inputs
9. Strategies & Partnerships
10. Sector Plans

The Municipal Council after consultation with its stakeholders and relevant partners will provide a draft document; the document will then be advertised for public comments and input, after consideration of the inputs from the stakeholders the Municipal Council will adopt a review document with the budget annually between April and May.

2.12 PERFORMANCE MANAGEMENT SYSTEM

The Municipality will strive to continuously improve its performance not only limited to compliance to the Department of Provincial and Local Government and the compliance to Chapter 6 of the Municipal Systems Act, these will be done through continuous benchmarking and adoption of best practices on Service Delivery, Administrative Systems, Planning and Financial Management.

The Municipality aims to ensure that its performance management system ensures accountability, transparency, efficient and efficient service delivery, good governance and community responsiveness. The following will be key Performance Indicators in line with the guidelines for the performance contract for section 57 managers in terms of the Municipal Systems Act 32 of 2000.

2.12.1 Objectives of Performance Management

- To excel in good governance
- To provide good infrastructure development
- To strengthen community and Stakeholder Participation
- To ensure efficient and effective administrative systems and
- To facilitate and support human resource development

2.12.2 Principles Governing Performance Management

- Customer focus
- Accountability
- Responsiveness

- Excellence and
- Service oriented

2.12.3 Performance, Monitoring and Review

The municipality's performance will be monitored and measured on an annual basis based on its core mandate in terms of bulk service delivery. Performance review in terms of service delivery will be done quarterly and should there are gaps the evaluators will provide recommendations to address such shortfalls. The municipality will review its performance management twice a year and subscribe to the best model that will consistently enhance the municipality's performance and give early indications if some functions and processes are not functioning adequately.

2.13 SUMMARY OF COMMUNITY AND STAKEHOLDER INPUTS

- During the IDP representative forum 2009 the Executive Mayor of the Govan Mbeki Municipality that the municipality need to engage residents in all the activities that the municipality intends rolling out. The issue of the employment equity as well as continuous training of staff members was also highlighted as strategic in employment relations context.

2.13.1 GOVAN MBEKI EMPLOYMENT EQUITY COMMITMENT

Govan Mbeki Conforms to the stipulations of Employment Equity act to promote and drive organizational transformation to ensure the elimination of unfair discrimination and ensure equitable representation of employees in all Occupational levels of the workforce.

The Objective of GMM is the eradication of discrimination in relation to employment through race, gender and disability that has denied access to opportunities for education, employment, promotion and to the majority of South Africans.

We are committed to the idea of affirmative action and employment equity to achieve a diverse workforce that is broadly representative of our people.

In terms of GMM Institutional transformation, we remain committed to address and ensure the following: creating a workplace that reflects the diversity of South African society, and contributes to maximising the human resource potential of all people.

Creating a harmonious, open, fair and democratic workplace based on human dignity, freedom and equality

The right to equality and employment opportunities between males and females, including people with disabilities.

To ensure that our workplaces are free of discrimination in the working environment. Taking pro-active measures to remove and prevent all direct and indirect barriers that adversely affect equal employment and employment opportunities.

Ensuring that policies, procedures and work practices are monitored to ensure legal compliance, adherence to best practice and integration of employment equity in every aspect and area of employment.

Enhancing and advancing skills by providing employment opportunities and training to designated and non-designated groups.

GMM is committed to comply with legislative requirements of Employment Equity and strive to give maximum effect to its obligations of Equality.

3. GOALS, OBJECTIVES AND KEY FOCUS AREAS:

3.1 POWERS, DUTIES AND FUNCTIONS:

3.1.1 Provision of Bulk Water, Sanitation, Roads and Storm Water and Electricity:

Objective:

To accelerate the Provision of Water, Sanitation, Roads & Storm Water & Electricity Services in partnership with key stakeholders to meet millennium targets and improve the living conditions for all.

Strategies and intervention for key focus areas:

- Govan Mbeki Municipality will implement projects that are identified in its water and sanitation blue print on annual basis in partnership with the district municipality and sector departments.
- Govan Mbeki Municipality will ensure integrated planning and provision of roads and storm water, sanitation, water and electricity to all un-serviced communities.
- Govan Mbeki Municipality will conduct annual audits to determine the level of services to be given to each community, effective mechanisms to deliver such services in consideration to spatial circumstances and other circumstances and available resources.
- Govan Mbeki Municipality will continue to carry its task as the Water Service Authority in partnership with all relevant stakeholders.

Private Sector	Sector Departments
Public Private Partnerships in accelerating implementation and investment infrastructure.	Support in development and implementation of WSDP / Transport and Electricity Plans.
Skills transfer and training of municipal staff	Co-funding for key projects to accelerate service delivery.
Form partnerships and provide technical expertise	Provide advice and technical assistance (hands-on support)

3.1.2 Municipal Health Services:

Objective:

To accelerate the Provision of quality Municipal health Services to all Communities in line with National Department of Health Guidelines, to ensure effective, affordable and accessible Municipal Health Services to all

Strategies and Key intervention for key focus areas:

- Govan Mbeki Municipality through the district's Integrated Waste Management Plan will address backlogs and Sector departments fund key identified projects.
- Govan Mbeki Municipality in corroboration with the district will undergo a Section 78 assessment in line with the MSA to determine the best service delivery mechanism for the delivery of Municipal Health Services.
- Govan Mbeki Municipality together with the district will strive to develop a Comprehensive Municipal Health Plan, Air Quality Management Plan and an Integrated Environmental Framework Plan in Promoting, Protecting and Conserving the Environment
- Govan Mbeki Municipality will align its by- laws and spatial development plans to incorporate these plans once completed.

Private Sector	Sector Departments
Public Private Participation in accelerating Provision, Promotion of Municipal Health Services	Support in the development and implementation of Municipal Health Plan, Integrated Development Plan, Air Quality Management Plan.
Skills transfer and training of municipal staff	Co-funding for key projects identified to accelerate service delivery.
Form partnerships and provide technical expertise.	Provide advice and technical assistance (hands-on support)

3.1.3 Disaster Management, Fire and Emergency Services:

Objective:

To provide a comprehensive Disaster Management, Fire and Emergency Services that will ensure that all communities are safe and get timely and adequate assistance and responses in time of need.

Strategies and key intervention for key focus areas:

- Through Service Level Agreements with GSDM, GMM will provide these services through partnerships, infrastructure development, training and provision of critical equipment needed.
- The district will investigate through provincial and national institute for disaster management and other recognised bodies an assessment mechanism for existing facilities, fleet and training needs for the Municipality.
- Training of staff and volunteers in disaster management will be conducted through the district in terms of the Act.
- The district will, in partnership with Govan Mbeki Municipality, develop a standard service delivery mechanism to plan and improve current service delivery in its disaster management centre and satellite disaster management offices.

Private Sector	Sector Departments
Public Private Participation in accelerating Provision of disaster management, fire and emergency services.	Support in the development and implementation of Municipal and District Disaster Management Plans.
Support mechanisms with resources and technical assistance.	Provide resources to municipalities to improve their infrastructure and service delivery mechanism.
	Timeously guide the district in line with the Disaster Management Act.

3.1.4 Traffic Law Enforcement and Licensing:

Objective:
To increase visibility of Traffic Officers and prompt licensing of vehicles within the Govan Mbeki municipal area.

Strategies and Key intervention for key focus areas:

- Govan Mbeki Municipality will strive to provide resources and facilitate partnerships for all role players to ensure good services in terms of traffic law enforcement and licensing.
- Govan Mbeki Municipality will facilitate the formation of a platform for all role players to share skills and good practices, mentorship and shared growth.
- Govan Mbeki Municipality will strive, in partnership with all stakeholders, to have a comprehensive marketing and awareness drive to promote compliance to required legislations dealing with traffic law enforcement and licensing in the municipality.
- Govan Mbeki Municipality through the signing of a Memorandum of Understanding (MOU) carry these duties on behalf of the Province.

Private Sector	Sector Departments

**LOCAL GOVERNMENT TURNAROUND STRATEGY (LGTMAS):
MTAS IMPLEMENTATION**

GOVAN MBEKI MUNICIPALITY

-1-

1. PREAMBLE

The Turn Around Strategy of the Govan Mbeki Municipality (GMMTAS) is informed by the Department of Cooperative Government & Traditional Affairs' Local Government Turn Around Strategy (LGTAS) as the basis of the Ten Point Plan for Local Government (2010 – 2014).

The goal of the GMMTAS is to work towards turning the Govan Mbeki Municipality into a responsive, accountable, effective and efficient municipality to restore the confidence of the majority of its inhabitants and achieve objectives such as:

- Accelerate service delivery on basic services i.e. water, sanitation, electricity, human settlement, refuse removal;
- Address immediate financial and administrative problems;
- To eradicate indiscriminate hiring and firing;
- Eliminate fraud and corruption;
- Ensure and implement transparent supply chain management system;
- Strengthen Ward Committee capacity and implementation of yet to be approved ward governance model;

- Include national and provincial commitments in IDP;
- Differentiate responsibilities and simplified IDP;
- Funding and capacity strategy for municipal infrastructure;
- Upgrade of informal settlements; and
- Implement revenue enhancement.

2. IMPLEMENTATION REQUIREMENTS

The GMMTAS will ensure:

- The active participation of all senior managers in its development and implementation;
- Financial support for implementation through necessary budgetary requirements;

3. DEVELOPMENT THROUGH STRATEGIC REVIEW AND PLANNING INTERVENTION

3.1. BACKGROUND

It is a standard practice and also a requirement of the Municipal Systems Act, Act No. 32 of 2000, for the Govan Mbeki Municipality to hold annual Strategic Review and Planning Interventions to examine progress made for the preceding year and to review/debate and craft its tactical plans/SDBIP's going forward.

Management Skills Intervention was appointed to provide facilitation and support for the intervention held 24-26th of June 2009, in Selbourne Park, Pennington and then finalized in Kintross, 17-18th September 2009.

3.2. SCOPE AND OBJECTIVES OF STRATEGIC REVIEW AND PLANNING INTERVENTION

The scope and deliverables (objectives) of the Strategic Review and Planning Intervention sessions were:

- Review achievements of the strategic objectives set during the previous session.
 - Presentation on performance management systems (best practices and recommendations).
 - Review of the 2007/2008 Service Delivery & Budget Implementation Plans (SDBIP's) and analysis of the 2009/2010 departmental SDBIP's and alignment to 2009/2010 Section 57 Managers' performance plans.
 - Discussion of the organogram and reaching agreement on the phasing-in process/method.
 - Team building Interventions
- 3-
- To produce a workshop report that documents the key issues debated, agreed on and observed with recommendations to inform the development of the strategic and operational plans and strategic management processes going forward.

3.3. APPROACH AND METHODOLOGY TO STRATEGIC REVIEW AND PLANNING INTERVENTION

A basic input-process-output model was used to plan and facilitate the strategic intervention sessions. Firstly (input) the aim of the strategic intervention sessions was determined; secondly (process) the strategic intervention sessions were held and thirdly (output); the compilation of a report concerning the deliverables. The following were the key areas designed to ensure the main deliberations (objectives) of the strategic intervention sessions were achieved:

- Strategic guidance from the Executive Mayor;
- Review of the 2007-2011 Integrated Development Plan;
- Review of the Legota Resolutions;
- Review of the 2008/2009 and 2009/2010 Service Delivery & Budget Implementation Plans;
- Organogram review; and
- Performance management best practices.

3.4. SIGNIFICANT FINDINGS AND RECOMMENDATIONS FROM STRATEGIC REVIEW AND PLANNING INTERVENTION

The purpose of this section is not to duplicate the detailed/specific findings, critical or otherwise, arising from the strategic intervention sessions but to flag the strategic observations and recommendations worthy of consideration at the management level and Executive Mayor's Meetings. These issues/findings/recommendations are:

- 3.4.1. The Integrated Development Plan of the municipality will be reviewed from time to time owing to internal and external changes. The goal of such changes is *inter alia* not only to revise and capture the municipality's five strategic objectives as driven by the constitution and legislation but also to reflect the critical national key performance indicators as defined in Section 53 of the Municipal Systems Act, Act No. 32 of 2000, read with Section 5(1) of the MPMR, enabling an outcomes based focus for IDP implementation in the next term.

-4-

- 3.4.2. The proposed organogram was recommended for submission to Council for adoption subject to further modification as discussed at the last day of the strategic intervention sessions with allowance for further review once the new term starts and a new IDP/strategy had been formulated.
- 3.4.3. Once an IDP/strategy is finalized containing a swot analysis, a strategic assessment of the municipality's performance will be undertaken based on the outcomes on a municipal balanced scorecard which will include the results of the monitoring and evaluation efforts as well as project management unit outcomes to decide if the structure needs further amendments. At this point Directors will be consulted to make proposals which will be expertly evaluated independently. A detailed business case/motivation for the proposed changes with attendant costs/budgetary implications will be compiled and proposed to Council with the results of the independent evaluation. To prevent subjective changes a cost guideline of 30% of the personnel emoluments to total cost per department (based on National Treasury Guidelines) will be a preset and pre-Communicated criteria for all departments.
- 3.4.4. A good number of proposals to the organogram were informed by the absence of effective co-ordination or presence of “functional silos” between the various departments which could be causing duplication of effort/resources and undermining service delivery. The problem could be worsened by the absence of a balanced scorecard system of aligning the municipality’s performance to ensure all critical functional linkages/dependencies and value chain is fully understood.
- 3.4.5. The status quo regarding the M&E Unit and PMU which was maintained following the delay in supporting the creation of a Chief Operating Officer position pending further political consultation could continue to constrain performance oversight. With the imminent development of PMS it may be useful urgently revisit this decision. Given the possible concerns around reporting lines if a Chief Operating Officer position is created and/or potential for conflicts if a Deputy Municipal manager position is created we see such significant synergies between some aspects of the statutory functions of PMU, the M&E Unit and the PMS that it will be sensible to rather create a Directorate of Strategic Planning & Performance Reporting which will house the IDP unit, PMS Unit as well as the M&E Unit which should incorporate all aspects of PMU other than project definition and delivery which should remain within the PMU in Technical & Engineering Services. This will not only assist the Municipal Manager and strengthen performance oversight across the

municipality but will also resolve the complex matrix reporting line problems under the proposed structure and resolve the potential skills shortage if the PMU was moved to the Municipal Manager's office thus leaving the Municipal Manager with overall accountability for the functioning and performance of the municipality.

- 3.4.6 The municipality lacks a formal PMS that meets the prescripts and intent of the MSA and related performance management legislation making it impossible to evaluate the overall performance of the municipality. The MSA requires that a municipality's PMS be linked to its IDP to reflect how implementation of the IDP will be monitored and how the key stakeholders will play their respective roles and be held accountable. The absence of such a system has allowed the current IDP to only devote a few paragraphs and yet without any specifics on how PMS will be implemented. There is an urgent need to develop a comprehensive PMS that will meet all legislative intent which at minimum should demonstrate the cascading of the IDP into a municipal wide scorecard to which departmental scorecards will be

-5-

developed and aligned and linked to the KPI's of the Section 57 Managers and from which SDBIP's will be developed and cascaded to the lower levels of the organization.

- 3.4.7. Insufficient strategic clarity/fit between the municipality's constitutional mandate and the 12 IDP priorities. The municipality's vision and mission is well crafted but the strategic priorities in the IDP are not focused and do not provide a sound framework for achieving operational effectiveness through the SDBIP's A structured municipal scorecard was proposed and adopted leading to the following as agreed framework for strategic planning:

LOCAL GOVERNMENT MANDATE AS PER CONSTITUTION / STRATEGIC FOCUS AREA	AGREED STRATEGIC OBJECTIVE
Infrastructure and Services	To provide, improve and sustain infrastructure and services
Social and Economic Development	To promote socio-economic development in rural and urban areas
Institutional Development	To enable and speed-up institutional transformation and effectiveness
Democracy and Good Governance	To strengthen democracy and good governance
Financial Management and Viability	To improve and sustain financial management

- 3.4.8. The absence of an effective performance management framework/system cascaded down the organization contributing to a misalignment of the SDBIP's and hinders operational effectiveness. Instead of formulating performance objectives on the SDBIP's based on the strategic objectives, these are being formulated around the various departments contributing to possible dilution of cross-departmental co-ordination around strategic objectives. Although the municipality has a well established process for drawing up its SDBIP's, gaps noted in the 2008/2009 SDBIP's could significantly impact on its ability to focus correctly and evaluate its own services delivery achievements. It is commonly said if you do not know where you are going any road will take you there and also that if you cannot measure it you cannot manage it. All senior managers had the opportunity to present their SDBIP's and the generic weaknesses in all these include the lack of alignment of operational performance objectives to the strategic objectives because goals were being formulated from the department instead of the strategic objectives which themselves had not been well clarified in the IDP, making a disconnect between vision/mission and operational focus. KPI's appeared to focus more on process than results/outcomes, critical performance targets did not appear to be well aligned to the approved budgets. All managers made significant improvement to their departmental SDBIP's in accordance with the principles espoused at the sessions. However due to the fact that the budgets have already been approved, the resulting changes will only come into full effect from 2010/2011.
- 3.4.9. There is generally a satisfactory level of implementation of Lekgotla Resolutions and the 2007/2008 SDBIP's. The following however remain the key challenges:

- MIG Working Committee established but is not functioning effectively hence the problems that it was designed to resolve remain;
- Long delays in filling vacancies;
- No consultant yet appointed for job evaluations; and
- Organogram review and issues relating to geographical pay differentials

-6-

- 3.4.10. The Bid Committees are functioning poorly and creating supply chain hold-ups and operational bottlenecks. The supply chain process currently is malfunctioning largely due to ineffectiveness of the various Bid Committees, slowing procurement throughput and resulting sometimes in forfeiture of budgeted funds back to the National Treasury.

3.5. CONCLUSION AND THE WAY FORWARD TO STRATEGIC REVIEW AND PLANNING INTERVENTION

The foregoing issues/findings/observations and recommendations mainly represent the matters that we deemed strategic to warrant executive attention and by no means intends to detract from the numerous resolutions adopted at the strategic intervention sessions that require focused and concerted management action to fully realize the ends of the overall intervention. Accordingly management attention is called upon to follow through on the detailed commitments and resolutions reached.

We have gained and retained significant institutional memory about the municipality and will resolve the foregoing problems whilst implementing the strategic recommendations contained in the Strategic Review and Planning Intervention Report. This will include the design of a comprehensive and world class municipal balanced scorecard and performance management system that meets and exceeds legislative intent and cascade it down to the lower management levels; the set-up of the Directorate of Strategic Planning & Performance Reporting with its IDP, M&E and PMU units; set-up and functioning of a Risk and Internal Audit system/structures.

4.2.13	General Valuation Roll: 2012 to 2016	Roll for 2008/2012 in place Roll for 2012/2016: process started	Council Res. Deferring next Roll for 2012-2016 by 31/04/10 Appoint Valuer End June '10	Drafting Item Drafting project plan Drafting Bid Specs for Valuer	Valuer appoint letter/contract Council resolution declaration date	COGTA: appoint new Appeal Board & support the valuation process
5. FINANCIAL MANAGEMENT AND VIABILITY:						
To improve and sustain financial management						
5.1.	Revenue enhancement programme	70% of the monthly bills are accurate.	80% of monthly bills are accurate by Dec '10.	Replacement of defective meters; field work to verify/ correct consumer data	Support from ward councillors and Office of the Speaker	Bills accuracy is increased by 10% by Dec '10
		24% electricity distribution losses is experienced by the Municipality.	Electricity distribution losses should be decreased by 10% by 12/2010	Sealing of electricity meters, cutting of services when bridging occurs.	On residential areas to conduct meter audits specifically, eMhlanzhini and eMzineni by May 2010 and completion expected by September 2010.	14% electricity losses
					To carry out the pilot project on automated master reading system by converting 30 conventional meters of large	R1 000 000-00
						R3 000 000-00

		power users. By May 2010. The extra revenue realised will be ring fenced to convert the remaining.
--	--	--

-30-

		To curb the losses the municipality will continue to disconnect services when bridging occurs.	Contractor identifies the problematic meters while doing meter reading and the report will be forwarded by finance to water department for repairs.	10%Water losses	None	CFO/Deputy/ Revenue Manager/ water manager	None	None	
5.2. Debt management programme	Lack of debt management system	15% Water distribution losses is experienced by the municipality losses should be halved by 5% by 12/2010	Water restriction devices for bypassed water meters, fixing of leakages by water department						R1 000 000-00
		Acquire a Debt Management system by 12/2010	Debt Management processes are done manually which then results to delays in debt collection actions.	95% Collection rate.	Remittance advice or payment Schedules, especially from Government Departments.	CFO/Deputy/ Manager	RD		

-31-

PERFORMANCE AREA / PRIORITY TURN AROUND FOCAL AREA / OUTPUTS	ACTIVITY	JANUARY 2010 (current situation / baseline) / Status Quo / Challenges	TARGET FOR 2010 (changed situation) /Measures of Interventions Required	PROJECT STATUS (Current status and relevant expenditure)	MUNICIPAL RECOMMENDED ACTION	INDICATORS	UNBLOCKING ACTION NEEDED FROM OTHER SPHERES AND AGENCIES (e.g. intervention or technical support)	HUMAN RESOURCE ALLOCATED	BUDGET ALLOCATED	BUDGET PROJECTED
5.3. Cash flow management	Strong reliance on overdraft facility to pay big payments e.g. Eskom, Rand Water and Salaries. The Municipality currently has an overdraft facility of R1 million that supports the monthly cash operations. This due to the fact that consumer accounts are only due by the 7 th of every month. The account is overdrawn round the 25 th and then after the 7 th if	To save 5% of the Collected Revenue to create cash backed reserves.	Currently assessing cost saving mechanisms.	Implementation of Debt Collection Strategy.	5% Investments of amounts collected on a monthly basis	Schedule of payment of equitable shares and timely payment thereof	CFO/Deputy/ Manager		R0	R5 000 000-00

5.4. Funding plan for capital expenditure	becomes favourable.	To channel 10% of the budget revenue for the capital investment	5% of Capital investment Programme is funded through grants : MIG, Gert Sibande, DME	10% of the capital expenditure be funded through CRR.	Encouragement of private public partnership with companies like SASOL, ANGLO coal and Harmony	CFO, Deputy PMU Manager/ Director Technical	None
5.5. Clean audit plan	The municipality achieved an unqualified Audit Report for the year 2008/09.	To maintain the status quo for the current year till 2014	Compile all reconciliations monthly (Bank, Creditors, Assets, Debtors, Valuation Roll, VAT, Conditional Grants, Investment and loans, inventory).	The monthly statements are to be reviewed by the Internal Audit unit to ensure compliance.	Finalisation of Grading of Municipalities in order to retain competent staff by SALGA.	All Directors	R250 000-00

PERFORMANCE AREA / PRIORITY TURN AROUND FOCAL AREA / OUTPUTS	ACTIVITY	JANUARY 2010 (current situation /baseline) / Status Quo / Challenges	TARGET FOR 2010 (changed situation) / Measures of Interventions Required	PROJECT STATUS (Current status and relevant expenditure)	MUNICIPAL RECOMMENDED ACTION	INDICATORS	UNBLOCKING ACTION NEEDED FROM OTHER SPHERES AND	HUMAN RESOURCE ALLOCATED	BUDGET	PROJECTED

5.5 POTENTIAL PROJECTS A: 2010/2011:

Project Name	Project Location	Project Objective	Key Performance Indicator
Resurface road between Evander and Secunda	Evander – Secunda	Resurfacing and fixing of potholes	Millennium Targets
Development of Old Age Homes	Embalenlle Emzinoni Lebohang	Establishing Old Age Homes in previously disadvantaged communities.	Well developed Old Age Homes.
Parks	Embalenlle Emzinoni Lebohang	Development of parks in support of "Greening Mpumalanga Project"	Millennium Targets
Libraries	Embalenlle Emzinoni Lebohang	Establishment of Libraries in previously disadvantaged areas.	Well established libraries
Agricultural Projects	All GMM areas	Promoting and capacitating emergent farmers	Economically adding value to farming scale
Electrification of houses	Embalenlle Emzinoni Lebohang	Electrification of all new developed and existing houses	Millennium Targets
Street and High Mast Lights	Embalenlle	Erection of street lights and high	Millennium Targets

Project Name	Project Location	Project Objective	Key Performance Indicator
Community Halls	Emzinoni Lebohang Embalenhe Emzinoni Lebohang	Building of community halls in previously disadvantaged areas.	Well established community halls
Tarring of all roads	GMM	To tar / pave all roads within the municipal area.	Tarred and / or paved roads
Speed humps	GMM	Development of speed humps at all main streets.	Well controlled traffic
Water supply	GMM	Provision of water to all households within GMM	Millennium Targets
Tarring of road between BMW and Sasol Road	Secunda	Tarring / paving of the road connecting to Sasol Road and Umuzi Lodge	Tarred / paved road
Storm water drainage	Embalenhe Emzinoni Lebohang	Ensure proper water drainage system	well functioning storm water drainage
Clinics	GMM	Establishment of further clinics within GMM	Health Care Facilities
Stadiums	Embalenhe Emzinoni Lebohang	Upgrading of stadiums to meet required standards	Millennium Targets
Main roads streetlights	Embalenhe Emzinoni Lebohang	Putting street lights at all main roads within GMM	Safety of Community
Fencing at all cemeteries	GMM	Application of an effective fencing system at all cemeteries	Cemeteries protected against vandalism and stray animals.
Housing Renovation of Municipal	GMM GMM	Building of all types of houses Upgrading and renovation of all	Established residential areas Well looked after buildings

Project Name	Project Location	Project Objective	Key Performance Indicator
Buildings		municipal buildings	
Pay Office	Charl Cilliers	Establishment of a municipal pay office	Fully fledged office
Robots	GMM	Robots in all towns	Traffic Control

5.6 POTENTIAL PROJECTS B: 2010/11

Project ID	Project Name	Estimated Cost (R)	Source Funding
EAT01	Upgrade Theatre Facility of Community Centre: (Curtains and Lighting facility, productions, buildings and technical).		GMM & External Funding
EAT 02	Upgrade and maintain Theatre facilities in Community Halls	180,000	GMM & External Funding
EAT03	Skills development for staff	56,370	GMM & External Funding
EAT04	Maintain Theatre and Office Air Conditioners	150,000	GMM & External Funding

Project ID	Project Name	Estimated Cost (R)	Source Funding
EAT05	Sports, recreation and indigenous games equipment	43,933	GMM & External Funding
EAT06	Disable Ramp	60,000	GMM & External Funding
EAT07	Theatre Cleaning Equipment	120,000	GMM & External Funding
EAT08	Sports, Arts and culture	600,000	GMM & External Funding

EAT13	Ensure safe and healthy environment	150,000	GMM & External Funding
EAT14	Maintenance of upgrade of library buildings, stock and equipment	275,000	GMM & External Funding

Project ID	Project Name	Estimated Cost (R)	Source Funding
EAT15	Provision of Library furniture and equipment	100,000	GMM & External Funding
EAT16	Provision of library facilities	3,500,000	GMM & External Funding
EAT17	Provision and improvement of Library infrastructure, ICT, Security and resources	1,600,000	GMM & External Funding
EAT18	Promotion of community participation, outreach programmes and LIS	15,000	GMM & External Funding
EAT19	Provision of extension services	235,000	GMM & External Funding
EAT20	Establish Tourism Satellite information offices	600,000	GMM & External Funding
EAT21	Tourism information services to community	8,000	GMM & External Funding
EAT22	Establish tourism curio and coffee shop	3,000,000	GMM & External Funding
EAT23	Bethal Dam Resort Supertube	500,000	GMM & External Funding
HCS01	Safety, Health and Environmental Training Centre	500,000	GMM & External Funding

Project ID	Project Name	Estimated Cost (R)	Source Funding
HCS02	Provide weighbridge and weighbridge control room	4,500,000	GMM & External Funding
HCS03	Street and Public Toilet Cleaning equipment	2,700,000	GMM & External Funding
HCS04	Prepare an Integrated Waste Management Plan	500,000	GMM & External Funding
HCS05	Relocate Evander Clinic	1,000,000	GMM & External Funding
HCS06	8-hour Clinic – Charl Cilliers	500,000	GMM & External Funding
HCS07	Renovation of Bethal Clinic	450,000	GMM & External Funding
HCS08	Community Health Centre – Thistle Grove	1,500,000	GMM & External Funding
TES01	Upgrade of admin buildings – GMM	2,850,000	GMM & External Funding
TES02	Upgrade of recreational facilities	2,140,000	GMM & External Funding
TES03	Upgrade of recreational facilities	110,000	GMM & External Funding

Project ID	Project Name	Estimated Cost (R)	Source Funding
TES04	Upgrade of workshop and stores	950,000	GMM & External Funding
TES05	Upgrade of workshop and stores	50,000	GMM & External Funding
TES06	Embalenhle Ext 10, Service 420 stands – Council contribution	3,800,000	GMM & External Funding
TES07	Furniture and equipment - PMU	24,000	GMM & External Funding
TES08	Electronic Building Plan Management System (BIMAS)	800,000	GMM & External Funding
TES09	Geographical Information System (GIS)	1,300,000	GMM & External Funding
TES10	Land Redistribution for Agricultural Development	2,000,000	GMM & External Funding
TES11	Land Use Management System (LUMS)	2,000,000	GMM & External Funding
TES12	Local Spatial Development Frameworks (LSDFs)	800,000	GMM & External Funding
TES13	Orthophoto Mapping (GIS)	2,700,000	GMM & External Funding

Project ID	Project Name	Estimated Cost (R)	Source Funding
TES14	Purchase land for Township Establishment	30,500,000	GMM & External Funding
TES15	Research studies and surveys	220,000	GMM & External Funding
TES16	Rural Development Strategy	1,000,000	GMM & External Funding
TES17	Township Establishment (Completion, Surveying and Proclamation)	3,975,000	GMM & External Funding
TES18	Construction of gravel roads (Kinross and Secunda – 5.6km)	2,000,000	GMM & External Funding
TES19	Construction of gravel roads (Bethal – 20km)	6,500,000	GMM & External Funding
TES20	Construction of new gravel roads (eMbalenhle – 40km)	12,000,000	GMM & External Funding
TES21	Construction of new gravel roads (eMzinoni – 20km)	6,500,000	GMM & External Funding
TES22	Crack sealing and Milling laying (Bethal – 290km)	10,000,000	GMM & External Funding
TES23	Crack sealing and Milling laying (Lebohang – 20km)	2,500,000	GMM & External Funding

Project ID	Project Name	Estimated Cost (R)	Source Funding
TES24	Crack sealing (eMbalenhle- 200km)	7,500,000	GMM & External Funding
TES25	Crack sealing (Trichardt – 20km)	2,500,000	GMM & External Funding
TES26	Replacement of plant and vehicles	25,000,000	GMM & External Funding
TES27	Transport Master Plan	1,960,000	GMM & External Funding
TES28	Upgrade of Tar roads (GMM – 20km)	2,000,000	GMM & External Funding
TES29	Upgrade of tar roads (GMM - 20km)	13,500,000	GMM & External Funding
TES30	Rebuild intersections – Bethal	1,300,000	GMM & External Funding
TES31	Construction of storm water (Kinross, Trichardt and Secunda – 4km)	5,000,000	GMM & External Funding
TES32	Construction of storm water (Embalenhle – 8.5km)	2,000,000	GMM & External Funding
TES33	Construction of storm water (Lebohang – 7.4km)	1,600,000	GMM & External Funding

Project ID	Project Name	Estimated Cost (R)	Source Funding
TES34	Construction of storm water (Bethal, eMzinoni – 20km)	5,000,000	GMM & External Funding
TES35	Storm water management system (GMM)	1,000,000	GMM & External Funding
TOTAL		184,522,303
